The American Cancer Society is a qualified 501(c)(3) tax-exempt organization. | The University of Georgia's terms of use Founded in 1785, the University of Georgia is the oldest college in the state, as well as its most comprehensive and diverse. Accredited by the Southern Association of Colleges and Schools Commission on Colleges, the UGA is home to 17 schools and colleges as well as one of the finest research libraries in the country. A wide selection of courses, certificates and diplomas online are offered in a range of subjects such as education, business administration, writing, psychology, health sciences and the arts. The programs are designed for convenience, so that students can complete courses from anywhere and sometimes that fit into their schedules, while maintaining high academic standards. Small classes allow students to maximize their interactions with peers and instructors. The UGA also serves students with specific online resources, including advisors, online career self-assessments and a dedicated librarian for online learners. Georgia Institute of Technology Georgia Institute of Technology, a leading research university specializing in advanced science and technology studies, offers online learners a variety of options. These include massive open online courses (MOOCs) taught by the school's world-class faculty and offered by Coursera, Udacity and edX; these courses can be completed at any time, from anywhere in the world, at no cost. Specialized online programs in high school mathematics, professional certifications and summer undergraduate studies are also available. Students from all disciplines - even those who are not enrolled in online diploma programs - can also choose from many individual online courses. Accredited by the Southern Association of Colleges and Schools Commission on Colleges, Georgia Tech has also partnered with Udacity and AT and T to develop a unique offer of degrees: a master's degree in computer science that is earned through the massive online format, with a significantly lower tuition rate compared to campus programs. In addition, the school now offers an online master's degree in analytics through edX, as well as a master's degree in computational sciences and engineering, which are possible to complete fully online depending on the specialization courses are chosen. University of North Georgia This multi-campus regional institution offers several fully online certificates, associate degrees and - mainly in education, health and human services and the arts and sciences - as well as an RN-to-BSN bachelor's program. Online courses at the University of North Georgia are taught strictly by UNG professors, using the same programs taught on campus, which meet the standards of the UNG accreditation body, the Colleges and Schools Commission on Colleges. Some courses fully online at UNG may still require students to complete proctored exams on campus. Basic courses can also be completed online through eCore, a state-wide system that allows students to take introductory courses offered online from one of its institutions; for these classes, students use free and open educational resources and digital textbooks. Online students also have access to 100% online tutoring services, as well as online Student Ambassadors, an organization created to promote off-campus activities for online students to foster student relationships and mentoring. Georgia Southern University Founded as an agricultural and mechanical college in 1908, Georgia Southern University has become one of Georgia's largest and most comprehensive universities with a designation as a PhD/Research University by the Carnegie Foundation. The university is accredited by the Southern Association of Colleges and Schools Commission on Colleges, and many individual programs have additional and specialized accreditations. In addition to a wide range of individual courses that can be delivered online or in a hybrid format (combining online and on-campus instruction), GSU also offers three fully online undergraduate programs - interdisciplinary studies, information technology and an RN-to-BSN - as well as more than 30 fully online graduate programs in areas such as business administration, education, health and humanities, engineering and information technology, and liberal arts and social sciences. GSU's online courses and programs allow students to complete courses from anywhere, without sacrificing quality: online courses are delivered by the same GSU faculty that teach on campus. The majority of online courses use an asynchronous format, so that the material can be accessed at any time, although some instructions - for example, in the RN-to-BSN online program - are done synchronously (in real time). Georgia College Location Milledgeville, GA Georgia College and State University (GCSU) is designated as the Georgia Board of Regents' Public Liberal Arts College. Current online degree offerings through the GCSU include several master's degrees in subjects such as criminal justice, music, business, public administration, education and nursing; and an RN-BSN program for nursing students. The college itself is accredited by the Southern of Colleges and Schools Commission on Colleges and the Nursing Program has additional accreditation through the Commission on Collegiate Nursing Education (CCNE) and the Georgia Board of Nursing. The RN-BSN program is designed for nurses who hold associate or nursing degree degrees and current RN licenses. Graduating from this nursing program requires 120 hours of credit, including credit hours in. Although this program is 100% online, students will have the opportunity to visit the campus as an option. Since GCSU is part of the Georgia University System, students interested in other online bachelor's degrees can access programs through other GCSU system universities. Brenau University There are currently 16 online degree programs at the University of Brenau at the undergraduate and graduate levels. Online bachelor's degrees are career-oriented and are considered 100% full-time online programs. However, students may participate in internships, fieldwork or other activities such as teaching students as part of graduation requirements. Online courses are delivered through the Canvas system and are offered in 7-week accelerated sessions with a cap of 20 students. All programs have liberal education requirements that are divided into specific categories, with courses such as reasoning, fitness, language, global awareness and civic engagement. Students must meet university admission requirements, and most programs have an MPA requirement of 2.5 for high school students and 2.0 for students transferred to college, with the exception of education and child nursing programs, which require an MPA of 2.75 in college transcripts. It is also worth noting Brenau's commitment to the quality of teaching; all instructors are certified to teach online after completing a four-week certification course satisfactorily. Columbus State University Columbus State University (CSU) students have a good variety of online degree options, both undergraduate and graduate. Bachelor's students can choose from four-year programs in business, communications, information technology, liberal arts, nursing or sociology. Specialized avenues include international affairs, military and global issues, the humanities and social sciences, and communication studies. These programs typically follow the schedules of semesters on campus in a synchronous format, with the exception of the nursing program. The RN-BSN Nursing Program is a 12-month program accredited by the CCNE, asynchronous, with clinical rotations required prior to graduation. Under the Georgia State University System (GSU), students can take advantage of courses through other colleges in the system, all of which use GoView to deliver courses in Students seeking an online bachelor's degree can complete all general education credits online at a reduced cost per credit through the system's eCore program. CSU students can also access online courses offered by colleges in other states through State Authorization Reciprocity Agreements (LEPs). Georgia Southwestern State University Georgia Southwestern State University (GSW) online bachelor's programs are career-oriented, and geared toward transfer students, military and spouses, students working full-time or others in need of additional flexibility. Accelerated online diplomas are by eMajor, the collaborative partnership between Georgia University System schools, designed to meet the needs of the workplace in Georgia and beyond. Online areas of study include business, criminal justice, information technology (WebBSIT) and nursing. Programs are fully online and vary in length, depending on previous learning credits transferred and enrollment. Costs per credit are reduced for eMajor students, and students can further reduce their costs by applying to multiple in-house scholarships and out-of-state tuition waivers. Another option for 4-year-old researchers is the ecore system, which allows students to complete all general education courses online, with reduced tuition fees and free textbooks. Ecore and eMajor courses can be asynchronous or synchronous and use GoView to deliver courses. Georgia Southern University-Armstrong Campus Armstrong State University and Georgia Southern University (GSU) recently joined to become a college. The Armstrong Campus is one of the three GSU campuses. It is located in Savannah. Students interested in a bachelor's degree can complete courses 100% online or in a mixed format, depending on the individual needs of the students. The diplomas offered include the RN-BSN, the BS in Information Technology and the Bachelor of Interdisciplinary Studies. The latter offers greater flexibility and is an excellent choice for transfer students and adult learners. Students can choose 3 areas of specialization for the requirements of the higher division courses, among the options of business, criminal justice, sociology, writing, pedagogical technology and public administration. Programs will have different admission requirements and will vary in length; an example is the Information Technology Program, which requires full preconditions before starting the program and takes 2 years to complete. The online courses are run by GoView, the university system of Georgia virtual education system, and are delivered by Desire2Learn. Albany State University Albany State University offers 4 years of online degree options in nursing, health and human performance, management and technology information systems, organizational leadership and social work. The Organizational Leadership Diploma offers areas of focus in the areas of health care or public service administration, office administration and technology. These diplomas are available fully online, with the exception of the BSN, health and human performance, which have basic online requirements and major courses in person. Online courses are delivered through GeorgiaVIEW and programs have recommended course follow-ups. Programs vary slightly in the number of credit hours required and may have different admission requirements. Students can transfer credits to shorten the duration of the program, and credit can be given to those with military training and relevant life experience. Specific requirements also vary, with some requiring hands-on and field work, such as social work and nursing programs. Savannah College of Art and Design Savannah College of Art and Design is a private non-profit institution with approximately 13,000 students. SCAD offers online bachelor's degrees in advertising, graphic design, interactive design and game development, photography or sequential art. In graphic design, the Bachelor of Arts or the Bachelor of Fine Arts are available. The courses are asynchronous with no specific meeting time and are accessible at any time. They start and end on a 10-week schedule, but e-learning students follow the same level of education and follow the same curriculum as traditional students on campus. Due to the strong digital design component in all these majors, SCAD recommends students to have a computer with 500GB of disk space, broadband connection, Webcam/microphone and 4-8GB of RAM. Applicants should have an MPA of 3.0 or higher and submit their ACT or SAT scores. All students are encouraged to apply. Those with lower amps or test scores can complete their candidates with a detailed resume, letter of recommendation and statement of intent. Purpose.
