Mechanical seal handbook pdf

Seal designers, manufacturers and end-users in the following industries; pumps, engines, plumbing, filtration, oil, gas, water, process industries, hydraulics, pneumatics, marine, automotive and power generation. Factory and maintenance engineers, specifiers, Consultants August 2020 - Heat pumps and thermal expansion April 2020 - Carbon/Graphite for dry mechanical seal faces December 2019 - FSA knowledge base updates June 2019 -High-speed tree sealing in turbomachinery March 2019 - Methods for pressurized seal systems January 2019 - Unusual applications of mechanical joints November 2017 - Seal Chamber Environmental Control September 2017 - Carbon working in mechanical sealing. July 2017 - Overview of multiple-lip seals. May 2017 - FSA Presents KnowledgeBase Technical Reference September 2016 - Back to Basics: Mechanical Joints June 2016 - Life Cycle Cost Analysis to Select the Best Sealing Solution December 2015 - Hardware Advances Improve Seal Reliability under Extreme Application Conditions September 2015 - Know Which Mechanical Seals Are Available Options Emissions Requirements January 2015 - Dry containment seals increase reliability September 2014 - The benefits of the IPY piping plan June 03, 2014 - New plumbing plans for better leak detection March 2014 - Double-gas lubricated joints provide solutions - What are the benefits of these joints? January 2014 - Extending the mechanical life of seals - how can they be improved in their reliability? February 2013 - What are the best practices for ensuring the reliability of the API 53B Piping Plan? January 2013 - How does the topography of the seal's face affect the mechanical performance of the seals? October 2012 - What is the waterproofing technology of choice for water and wastewater treatment? June 2012 - How do variable-speed workouts impact mechanical joints? April 2012 - Why are mechanical seals still the preferred choice in process industries? October 2011 - What are the challenges of water application waterproofing? July 2011 - How can I select mechanical sealing systems using lifecycle costs? February 2011 - How can I determine the capital investments at a better time before repairing and energy efficiency of an improved waterproofing system? November 2010 - What is the impact of reliability on the energy footprint of waterproofing systems resulting from shutdown, repairs and pump commissioning? (Part 4 of 4) October 2010 - What is the energy footprint of waterproofing systems to remove diluents from the process flow? (Part 3 of 4) September 2010 - What is the energy footprint of waterproofing systems for control control or temperature of the barrier fluid? (Part 2 of 4) August 2010 - What is the energy footprint of waterproofing systems? (Part 1 of 4) May 2010 - Which plumbing plan should I choose: API 53A, 53B or 53C? December 2009 - What are the basics of gas lubricated joints? (Part Two) November 2009 - What are the basics of gas lubricated joints? (Part One) April 2009 - How can the raw material capacity of seals be improved? March 2009 - How do plant pipe stress problems affect my pumping systems? January 2009 - How can I extend the performance range of standard cartridge mechanical seals? December 2008 - P3-A equipment standards November 2008 - Who should refurbish my seals? August 2008 - Where mechanical joints meet the pumps: what's the next generation? May 2008 - What determines seal leaks? March 2008 - What is the most effective seal design for misalignment? December 2007 - What are the methods for successfully sealing sludge? October 2007 - How can I reduce the consumption of seal water for my packaging and mechanical joints? September 2007 - What are the considerations associated with applying mechanical joints to abrasive mud applications? June 2007 - What should I look for when choosing a high-performance elastomer for a specific application? April 2007 - How long will a mechanical seal last? Part March 2, 2007 - How long will a mechanical seal last? Part February 1, 2007 - When and where should I apply lip seal technology in my process? January 2007 - What procedures should I use to store my mechanical joints? August 2006 - When and how can I use api Flush Plan 54? January 2006 - What is the best silicon carbide face material for my mechanical joint? December 2005 - What is the best wear facial material for my mechanical joint? September 2005 - Is failure analysis the best approach to addressing seal failures? July 2005 - Can I seal vertical trees with standard mechanical joints? June 2005 - When and how to use api Flush Plan 53? January 2005 - What tools are available to apply the total cost of the life cycle to the selection of mechanical sealing systems? December 2004 - What are the main symptoms, causes and corrective measures in the event of mechanical joint failure by thermal attack? November 2004 - What are the main symptoms, causes and corrective measures in the event of mechanical joint failure caused by mechanical failure? October 2004 - What are the symptoms, causes and corrective measures in the event of failure mechanical joints induced by a chemical attack? September 2004 - How do you determine the main cause of mechanical joint failure? Failure? Failure?
