The first option is to do it via the Internet, to do it online, the applicant must have the plates license and the last five digits of the vehicle identification number; In the case of a vessel or boat you will need Hull Identification Number, and smog certification; last time, you must have the renewal notification with your current home address. At the moment of renewal the applicant must have no doubt or violation. Once the applicant has processed the renewal, he or she will receive a sticker within the next 5 days with the renovated disc. The second option is through a DMV auto service terminal (Department of Motorized Vehicles), where you can get the new sticker immediately. Apart from the registry renewal, you can operate other formalities from there, such as paying the recovery risk of suspension of the vehicle's plate, presenting or renewing the declaration of an unreathed vehicle, among others. Such terminals help to avoid waiting lines and to make more efficient and fast transactions, you can use these terminals for all types of vehicles, pickups, motorcycles, house trailers and commercial vehicles that do not need a commercial plate. The last option for registry renewal is through the Business Partners Automatization program (BPA). The DMV allows business partners to process and issue license plates, allowing decals and plates among others. When a sale/purchase of a vehicle occurs, the titration of it must be transferred to the new owner, unless it is a funded purchase, in which case the owner remains the same until the payment is completed, thus transferring the titling to the new owner. When this documentation is lost, the owner can apply for a copy in the state where the title was issued. The data we find in this documentation is: Identification number, brand of vehicle, year of manufacture, plate number, owner details and, in case there is doubt at the moment, the data of the person to whom the money owes.
