The Shadow Bringers have been updated! Level up botany at speed 01 to 80! Recommend Mavs? Botany items? Stop wasting time! Get your botanicals! 403 ISSUE: I tried something, hoping to alleviate this issue for the affected users. Please let me know if it helped! - Mahiko Hope SanBTN Exfoliation Navigation Guide: [01-15] | [16-35] | [36-50] | [50-60] | [60-70] | [70-80] Botanist L70 to 80 – First Step, Well, Well... So you did it! The layer of Shadowbringers is unusually friendly, so there's something to look forward to. Let's go! Before we go any further, stock up on some things! Every journey is incompatisted without supplies - and the botanist's guidance to 80 is no exception. The L70 botanist for L71As always, we begin our botanical spasm journey with a new layer blessed by the terrifying dead zone. But don't worry, Mahiko San has been watching you! I also recommend you read each passage, (for example read this passage of text then level to 71 and so on)L70 to L71 - the dead zone, and why? Random Equipment Levels: I can't tell what kind of equipment you enter Shadowbringers with so I can't make general recommendations. You're very likely wearing some pretty sub-optimal equipment. There's not much grind! There is only one new item available for you to grind/farm (so un exciting...), so pepper overnight in Aque araang. You also have one new unsynthy node (which happens to be collectable to you which you likely can't process). Levequests are the key to escaping the BTN L70-L71 dead zone! Open Crystarium Shipments (Class Quest)Shadowbringers gives us Crystarium shipments, which should not be compared with older custom delivery systems. It's basically joint status missions. For a botanist, that means opening up the face of Gathering.A a lot of reminders and things to do here, but ultimately Levequests are the main source of EXP to emerge from the dead zone, supported by GC submits & Quest Class.New Skill @71 - SticklerStickler is a pretty cool skill, but there are very few applications peeling up. Stickler's main use case seems quite niche – I'm out of the GP, but will sacrifice a convergence attempt to push my rating a little higher. Botanist L71 to L72Quite a little bit going on here so read! First and foremost, upgrading equipment is much needed! So you can finally experience collectibles for DAT SWEET XP. With these exact mergers and gear you can get extra collectibles as well, 100% of the time! Click Collect until the node disappears. I don't know if I can do su_tab job. If you need a little reminder about what and how it works, here it is. With a collector's glove on, instead of collecting an item you enter a mini-game, with the aim of increasing the collectability of items. The material can stand at 30 wear (many of your collecting skills interact with item wear). Other than wearing, you must still respect collection attempts. Once you're satisfied with the pickup capability, click the Collation button until you can't collect anymore. BTN L71+ collecting locked beids! Grinding? You can finally access a bunch of new items to collect. Many of them are useful if you're going to be exfoliating DoH.BTN L71+ Levequests? I do not recommend Levequests in your regular activities from now on. If you insist on doing them (like, for example, if you're not peeling DoH classes) then I'll list the big L72 leves in the next part. Botanist L72 to 74 has no change in your strategy for two levels. There are several events, comments, and decisions you need to make listed in the boxes below. But once you get to L74 please proceed to the next block of text. Collectibles (Beans & White Oak Branch)& Levequests (only if you're RUSHING)& Grinding mats you need or sell. While maximizing the daily GC deliveries and weekly custom deliveries (if you choose to use them on your botanist). BTN L72 Levequests! doesn't recommend doing this unless you're really in a hurry (they're better spent on DoH and fishing, IMO), or you're over-capped on Leves. But here they are. Unspoilt collectibles? If you've noticed your new collection, Wheat Upland, it's pretty bad. It's one of those always available collectibles that aren't really worth it. Please note that I would almost never recommend these types of collectibles. Why? Well, the collection attempts are atrousply so you'll likely only get 1, maybe 2, MAX collection from one of these, wasting your entire GP for SUBPAR EXP compared to the unscrilly ones. Again, there's nothing special here. It's smooth and fast sailing as collectible spam is exp awesome. Open all botany err L71-74! Personally, I like to pick up every item. It gives exp bonus and prevents future hassle. Someone might as well do it now! Do this by accessing the picking log. Collect 10 each and sell them! Botanist L74 to 76While Your daily life stays the same, you have some upgrades you need to address, and some of these optional ones to consider.
