Our range of bottle fillers includes gravity fillers, volumetric fillers for viscous products and dry products such as spices. Our bottle filling equipment is provided as a standalone filler with a capper or monoblock filler capper. Included in our various bottle filling machines are various bottle flushing machines, labellers as well as conveyors and accumulation tables. We can offer filler machines for pharmaceutical, cosmetic, home and personal care as well as milk and food applications. SA Fillers (Pty) Ltd offers complete filling channels and can support clients with video jet printers and shrink wrapping equipment to complete lines. We also offer our expertise and experience to our clients to help plant layout and line control. How can we help you? Filler SA | Filling Machine South Africa SA Fillers design, manufacture and install modern, quality filling and packaging machines in Southern Our specialty is in liquid filling machines and spices Our machines are perfect for small to medium sized startups and startups We believe in quality service above all else and offer 24/7 support to our clients Our Machines not only look professional, but are also manufactured with high quality materials that will last. Format Bottle Cap Format Dimension Production Speed PET 500ml 28mm plastic cap 1000bph Water treatment system UV light sterilization Ozone generator 20 inch filter Description K11000 Filling System is a machine for in-line flushing, filling, capping, labeling and water coding to 500ml PET, with a maximum production capacity of up to 17 bottles /minute. This machine mainly consists of: Manual water bottling machine used in commercial applications to clean and fill any bottle ranging from 500ml to 2 liters. Manual water bottling stations are most commonly used for 500ml bottles in commercial bottling operations. Manual water bottling machine is capable of producing up to 1.000 bottles x 500ml per hour with 4 labor workers tending to the filling line, making it very efficient and cost-effective in areas with low labor costs. This manual water bottling station is able to clean 12 bottles at once and fill 6 bottles at once. The bottles are inherited by rinsing ozone bottles that use ozone and pure water to clean and rinse the bottles to prevent contamination. The system includes a restriction and labeling system that allows you to clean, fill, close, and label water bottles all with one simple, trouble-free machine. This bottling machine has a compact design that includes a bottle holding area, 12 head bottle rinses, a 6-fill filling station, a capper/label station, and a delivery station. It can be configured in a straight line or in an L-shaped configuration making it very versatile and can adapt to various locations and space constraints. All stations and tables are made of stainless steel which allows them to be highly durable and rust proof resistant. The working table includes a storage rack under the top of the table that allows storage of bottles or various supplies such as labels and hats. The water bottling machine has a very user-friendly and trouble-free operation due to its simple yet effective design. Its unique design allows it to be very energy efficient compared to other water bottle filling machines. The system does not use exclusive components and simple electrical components to ensure reliability and almost no maintenance costs. Water bottle filling machines are the main bottle filling option for commercial bottling operations worldwide and have proven to be highly effective and reliable in a wide range of applications. It can be used to fill any bottle or container up to 18 inches and can be used with any type of water such as reverse osmosis or Water. Machine multi-format capability can be built according to customized bottle format range. Standard bottle dimension range is: Diameter (or square dimension): Height 60-150 mm: 150-320 mm Condition: Change Full format or blank top operated with replacement of parts depending on the following format: Opening of mandrel arm Infeed timing screws Application conveyor tab conveyor bottle This section is designed with fast turn feature. Capping Machine Labelling Machine Labels can be die cut, butt cut or transparent. No expert knowledge is required to set up and operate the machine. Ideal for un skilled labor conditions. Change in minutes – no tools or changing parts are required. The wallpaper is rolled up on a take-up shaft equipped with a quick strip clamp to remove labels that are easily partially applied or fully wrapped. Strong construction - made of heavy duty steel and finished in durable zinc electrolation. Reliable and trouble-free service for many years. Minimal maintenance is required - maintain cleanliness. No electricity or compressed air needed – fully hand-operated. Machine Dimensions: Label Size: Length 650 mm: Web Max 400 mm: Max Reel Diameter width 200 mm: Height 320 mm: 320 mm Min Core Silent: 40 mm (40-50 mm mm) Mass: 19 Kg Bottle size: From 20 mm idle to about 110 mm Shipping volume: 0.08 cub M Mass: 21 Kg INKJET DATE BATCH CODER 1, It is a lowcase continuous schedule inkjet printer. 2, It can be widely used in some processing industries. 3, It has stable working performance, clear printing quality. 4, It is an automatic marker machine of high performance price ratio. 5, Functions, A, English, numbers, dates, lot numbers and other information. B, 1 to 5 letter lines. C, The printing injection head can wash itself automatically. D, It has an excellently designed structure, easy operation. E, An easy operational ink addition system, can work automatically. F, the display operating system, can worry about problems on time. G, It works with low ink consumption, saving costs for clients. H, It can be connected with PLC, weighing instruments, PCs, EPR systems and other software systems. I, By printing products, clients can easily follow and manage products in the market. Packing Speed Shrinking Wrapping Machine: 1 - 10 packs per minute. Specially designed infeed roller table for heavier package handling. Manual machines are designed for U.S. businesses that do not require high packing speeds Business entry level, whether industrial beverage, wholesale or stationary. DESCRIPTION ITEM 1 Filtration includes 4 x 20 inch filtration housing 20 microns 5 microns 1 micron UV water sterilization lamp filter 1.1 units Ozone with 200 liter tank to rinse empty bottles 1 Flushing and filling machine 2 machines Capping 3 3 machine 4 Coding Machine with conveyor 5 Shrinking machine 6 tank plastic tank 1000 Liter
