Address field - enter an address, city, country, place name, zip code, or other location name in this field, and then click the search button to get its latitude-longitude, coordinate pair. The result will be displayed in the box below or to the right of the search button (depending on the width of the device you are looking at). Latitude and Longitude fields - type the latitude and longitude of the place you are trying to find, and then click the search button. Again, your result will be displayed in the box below or to the right of the search button. This controls the current map parameters by selecting a menu. The card type selects the base layer of the card and thus controls the overall appearance of the card. The overlapping menu is a multiple choice. Select the check boxes(s) of the layer(s) you want to overlay. Use the slider on each layer to control its transparency-opacity. The zoom menu controls the zoom level of the map (you can also use the +/- map control). Its scope is affected by the choice of layers. Map height Click and drag the small, gray grab to the bottom of the map to adjust its height. Resize the width of the window to increase or decrease the width of the map. Return the card to its default and size values by clicking the reset card button. Clicking the button will load your location on the map. Simple standard 71.706936, -42.604303 Decimal degrees 71°70'69.36" N 42°60'43" W degrees, minutes and seconds 71°42'25" N 42°36.258" W copyright © 2021 Multiplication Media, LLC. All rights reserved.
