Compound of phosphorus and barium

As a result of the EU General Data Protection Regulation (GDPR). We do not allow internet traffic to byju's website from countries within the European Union at this time. No tracking or performance measurement cookies were served with this page. Barium metofsat name IUPAC name barium(2+); dioxido(oxo)phosphanium Identifier CAS number 13762-83-9 ECHA InfoCard 100.033.951 PubChem CID 3084168 CompTox Dashboard (EPA) DTXSID3087257 5 Characteristics Chemical formula Ba(PO₃)₂ Molar mass 295.27 g/mol Appearance Powder[1] Density 3.63 g/cm³ Melting point 1 560[2] °C (2,840 °F; 1,830 K) Unless otherwise stated, data are provided for materials in their standard state (at 25 °C [77 °F], 100 kPa). Infobox references Barium metaphosphate is an inorganic substance with the molecular formula Ba(PO₃)₂. It is a colorless solid that is insoluble in water, though is soluble in acidic solutions through slow resolution. [3] X-ray crystallography shows that this material is composed of Ba²⁺ cations attached to a polyphosphate ((PO₃)_n) anion. [4] A number of hydrated forms are known to be actually cyclic metaphosphates, Ba₂(P₄O₁₂)·3.5H₂O, Ba₃(P₃O₉)·2·6H₂O. [5] The structure of a subunit of linear polyphosphateanion. Preparation Barium metaphosphate may be prepared by the reaction of barium carbonate with methaphosphoric acid:[5]- BaCO₃ + 2HPO₃ → Ba(PO₃)₂ + CO₂ + H₂O or alternatively by an aqueous reaction of barium chloride and sodium metaphosphate:[5]- BaCl₂(aq) + 2NaPO₃(aq) → Ba(PO₃)₂ + 2NaCl applications The combination of sodium and barium polyphosphate forms a low-melting glass with a high coefficient for thermal expansion. The melting point of the glasses increases with barium content. This glass makes seals with low melting metal like aluminum (melting point 650 °C). Normal borosilicate glass softens above the melting point of the aluminium. This mixture is produced by heating a mixture of diammonium phosphate, sodium carbonate, and barium carbonate. Product Name: Barium Phosphate Product Number: All applicable US Elements product codes, e.g. BA-PAT-02 , BA-PAT-03 , BA-PAT-04 , BA-PAT-05CAS #: 13517-08-3Relevant identified uses of the substance: Scientific research and developmentUppler details:American Elements10884 Weyburn Ave.Los Angeles, CA 90024Tel: +1 310-208-0551Fax: +1 310-208-0351Emergency phone number:Domestic, North America: +1 800-424-9300International: +1 703-527-3887Section 2, RISKS IDENTIFICATIONClassification of the substance or mixtureGHS Classification in accordance with 29 CFR 1910 (OSHA HCS)Skin irritation (Category 2), H315Eye irritation (Category 2A), H319GHS Label element, including precautionary statementFormed word: WarningHazard statement(s)H315Investigates skin irritation. H319Cons severe eye irritation. Protective indication(s)P264Wash the skin thoroughly after handling. P280Clothing protective gloves/ eye protection/ face protection. P302 + P352IF ON SKIN: Wash with plenty of soap and water. P305 + P351 + P338IF IN EYES: Rinse gently with water for several minutes. Remove contact lenses, if available and easy to make. Continue rinsing. P321Specific treatment (see additional first aid instructions on this label). P332 + P313If skin irritation occurs: Get medical advice/ attention. P337 + P313If eye irritation persists: Get medical advice/ attention. P362Remove contaminated clothing and wash before reusing. Hazards not otherwise classified (HNOC) or not covered by GHS - noneSECTION 3. COMPOSITION/INFORMATION ON INGREDIENTSSubstancesSynonym: Tribarium diphosphateBarium orthophosphateFormula: Ba₃(PO₄)₂Molecular weight: 601.92 g/molCAS-No.: 13517-08-3EC-Nr.: 236-856-9Index-No.: 056-002-00-7SECTION 4. MEASURES FOR FIRST AIDDescription of first aid measuresGeneral adviceConsultants a doctor. View this safety data sheet for the doctor present. Move from dangerous area. When inhaledIf inhaled, move the person in fresh air. If not breathing, give artificial respiration. Consult a doctor. In case of skin contactWash with soap and plenty of water. Consult a doctor. In case of eye contactRinse thoroughly with plenty of water for at least 15 minutes and consult your doctor. If swallowedNever give anything through the mouth to an unconscious person. Rinse mouth with water. Consult a doctor. Most important symptoms and effects, both acute and delayedThe main known symptoms and effects are described in the label (see section 2.2) and/or in 11In the event of any possible medical care and special treatment, no data availableSECTION 5. FIREFIGHTING MEASURESExtinguish mediaReadable extinguishing mediaUse appropriate extinguishing mediaWater spray, alcohol-resistant foam, dry chemical or carbon dioxide. Special hazards arising from the substance or mixture Oxides of phosphorus, Barium oxideAdvice for firefightersClothing standalone breathing apparatus for firefighting if necessary. Additional informationavailableSECTION 6. ACCIDENTAL EMISSION MEASURESPersonal precautions, protective equipment and emergency proceduresUse personal protective equipment. Avoid dust formation. Avoid breathing Vapours, mists or gas. Make sure that the ventilation is adequate. Avoid breathing dust. For personal protection see section 8.Environmental protectionDo not allow the product to enter the drain. Methods and materials for containment and decontaminationPick up and arrange disposal without creating dust. Sweep up and shovel. Store suitable, closed containers for disposal. Reference to other sectionsFor disposal see section 13.SECTION 7. HANDLING AND STORAGEPrecautions for safe handlingDeviate contact with skin and eyes. Avoid the formation of dust and aerosols. Provide appropriate exhaust ventilation in places where dust is formed. For precautions see section 2.2.Conditions for safe storage, including any incompatibilitiesKeep containers tightly closed in a dry and well-ventilated place. Specific end-use(s)Apart from the uses mentioned in section 1.2, no other specific uses are stipulated SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTIONControls With workplace control parametersIf they do not contain any substances with occupational exposure limits. Exposure controlsAppropriate engineering controlsHandle in accordance with good industrial hygiene and safety practices. Wash hands before breaks and at the end of the working day. Personal protective equipmentEyes/face

protectionSafety glass with side protection conforming to EN166 Use eye protection equipment tested and approved to appropriate government standards such as NIOSH (US) or EN 166(EU). Skin protectionHandle with gloves. Gloves must be inspected before use. Use the correct glove removal technique (without touching the outer surface of the glove) to avoid skin contact with this product. Discard contaminated gloves after use in accordance with applicable laws and practice. Wash and dry hands. Body armor imperious clothing. The type of protective equipment must be selected after the concentration and amount of the dangerous substance in the specific workplace. Respiratory protectiveFor nuisance exposures, type P95 (US) or type P1 (EU EN 143) uses particle respirators. For higher level protection use type OV/AG/P99 (US) or type ABEK-P2 (EU EN 143) breathing cartridges. Wear respiratory protection and parts tested and approved according to appropriate government standards such as NIOSH (US) or CEN (EU). of environmental exposureThe one does not product fallow drains. SECTION 9.
