Surgi-sharp angle guide

The Surgi-Sharp Universal Angle Guide converts the standard 1 sander into a very accurate sharpening machine. The angle guide glides on the platen, a metal rod that is directly behind the grinding belt. The guide took place in a place with a very strong spring. The grinding belt operates between the base and the angle table. The guide will give you sharpening angles from 10 to 45 degrees. Provided that there is an angle guide diagram that will help you choose the right angle for each tool. Choose one of the Surgi-Sharp honing systems to deburr and tease to the surgical edge, it doesn't get any sharper than that. Surgi-Sharp® assorted size leather belt grinders and a set of drill presses, leather clad wheels bench grinders, and an angular guide to repair the edges of your tools. To view the full list of all our products, click here. Belts Surgi-Sharp Leather Honing Belts are made from top quality shoulder leather. The joints are smooth and stronger than the surrounding skin. Belts are produced smaller than grinding belts to provide a natural stretch of skin. They will be suitable very cozy when originally installed. The polishing joint shall be applied to the safety-belt in accordance with the instructions on the packaging. Some sets come with a polishing connection or you can use one that suits your specific needs. In addition to the quality honing tools and knives that these belts produce, they are also well suited for a variety of other polishing jobs. Our leather belts come in different sizes with the most popular being 1 X 30 or 1 X 42. We also custom build belts to your specifications. You can build your own tool with grinding belt; then push that surgical edge with our leather belt! It also has a remarkable polishing belt for flat and curved surfaces. Standard belt dimensions 1 X 42 1 X 30 2 X 48 2X 42 1 X 36 (strip) Wheels Surgi-Sharp Leather clad wheels are plywood wheels with leather glued to the face or on the face and on both sides. Plywood is trued on lathes; then the skin is trued after it is bonded. The wheels are 6 or 8 and will fit 1/2, 5/8, 3/4 and 1 shaft. The widths are 3/4 with face only and 1 with face and side. Another sand polishing compound can be applied to the face and sides if you choose completely on the wheel. Many people prefer to wheel with skin only on the face and add sandpaper to the side with disc cement. Be sure to keep the cement off the skin, center the bushes, or the hole. A popular combination is two wheels, one with 320 and one with 600 sands of wet or dry paper on each wheel side. Then apply gray (aggressive connection) to one wheel and red (fine connection) to the other. Standard wheel sizes 6 X 3/4 Leather clad wheel (face) 8 X 3/4 Leather clad wheel (face) 6 X 1Skin clad wheel (face and side) 8 X X 1 Leather clad wheel (face & & Jewellers Spindle Jewellers wheel is pre-threaded to fit both right and left hand jewelers shafts. 6 X 1 Leather Clad Wheel (face and side) 6 X 3/4 Leather Clad Wheel (face) Combination Sets and accessories Surgi-Sharp Leather Sleeve fits 1-1/2 X 2 grinding drum. It works on a boring press or can be very portable when used in a hand drill. It is very popular with carvers and knife makers when they need a smaller radius honing drum. The Surgi-Sharp SS10 Universal Angle Guide converts the standard 1 sander into a very accurate sharpening machine. The angle guide glides on the platen (metal rod located just behind the grinding belt). The guide took place in a place with a very strong spring. The grinding belt operates between the base and the angle table. The guide will give you from 10 to 45 sharpening angles. Each instrument may indicate the angle you have chosen from the manual provided on the packaging. Each subsequent sharpening will be the exact angle you specify. The Surgi-Sharp SS10 Universal Angle Guide converts most standard 1. table strap grinders into an accurate sharpening machine. The angle guide glides on the platen (metal rod located just behind the grinding belt). The guide took place in a place with a very strong spring. The grinding belt operates in a narrow space between the base and the angle table. The guide will provide you with adjustable sharpening sharpening from 10 to 45 degrees. If you want, you can point to the angle of each specific tool that you have chosen from the manual provided on the package. Each subsequent sharpening will then be the exact angle you specify. (Please note when sharpening, using an angle guide, you sharpen against the direction of the lumbar knee. Sharpening against the direction of movement of the belt is fine with abrasive belts, but must not be carried out with leather belts or non-woven belts. Please use caution and common sense..... and follow the instructions for the angle guide). CHECK SURGISHARP.COM FOR A FULL DEMO BY MANUFACTURER. PLEASE NOTE THAT GRINDING MACHINE NOT INCLUDED IN US IS STOCK Sonic Sales Machines accepted PayPal, credit cards (via PayPal or by phone), & Bank Transfer (NAB) Sonic Sales uses Auspost eParcel to distribute our products to Australia Wide.
