Bleach brave souls character link guide

19 What is Potions Link? Link Potions allows you to inherit part of the statistical character How much does it take to maximize ONE slot link so that 2250 overall How much is the level per slot? Up to 10 levels What statistical parts of the characters do you get? If your maximized Slot gets 20% that associates character statistics What are the requirements? -Linked characters must be the same attribute of the character you upgrade the potion Link may be the hardest bendering in this game because when you are rye for potion links, You need 2250 of them to fully maximize the one-character slot, which the average drop rate is 5-15 drops per barn run, that's about 225 runs. Now, if we add to the factor that you might want to maximize more than one character and the fact that potion is a specific attribute you are bound to spend 10+ hours only for two or three characters, that is the whole working day. But you might ask yourself, do I need to maximize this slot? And the reality is, no you don't, but if you're a high-level player planning to be on a top-tier pyp, you'll want to maximize those slots so you can have an edge over people with meta teams, assuming you run one as well. Get An Entry Wiki Related App October 11 Related Wiki Entry 04/08/20 Related Wiki Entry October 25 Share There are several ways to increase your character. See here for more information on Resurrection 5★ characters. See here for more information on Heritage. See here for more information on Transcendance. The color of the character level indicator changes depending on how far the character has been powered. Use Crystals/Gems and Coins to strengthen The Soul Tree has a unique Soul Tree. At The Soul Tree, you can choose what you want to improve and strengthen the character by using coins and power materials. Each Soul increases certain aspects of the character and requires a prescribed amount of certain power materials to strengthen. Tap and hold the Soul to check the amount and type of power material needed to unlock the soul. You can also tap on certain power-up materials to view the list of where the item can be obtained and then switch there. The soul comes in the following types: Spirit Orbs can also be used to reinforce characters. Multi-Power-Up You can use any available coins and power-up materials to open multiple Souls on Soul Tree simultaneously. Leveling You can increase the level of characters by using a special Crystal called Crystal scomes in the following varieties: Fuse characters together to increase the maximum level of basic characters. Basic Character Basic Character will be the character to be improved during Ascension. Special Step Moving Special Step Moving Special Step Characters by combining them with the same characters or by using Special Step Resources. The characters are considered the same if they have the same name, Attribute and thumbnail as the basic character, regardless of whether the character has been Raised or Resurrected. A SPECIAL UP icon will appear on the Ascension screen next to any characters available that can be used to level the Special Steps of the basic characters. You can increase to any character has been Raised or Resurrected. A SPECIAL UP icon will appear on the Ascension screen next to any character has been Raised or Resurrected. A SPECIAL UP icon will appear on the Ascension screen next to any character has been Raised or Resurrected. the level of Special Movement characters even if the basic characters and you can use characters that aren't raised or not resurrected to master the Special Steps of Resurrection characters or Resurrect the same version. Using the same character as a fodder character for Fusing won't get Transcendence Points. Using Special Step Resources will not increase the level of Ascension. When this gauge reaches the maximum, the character will rise to the next level. Source Characters Select food characters to Ride basic characters and make you more Transcendence Points when applied to Ascension. Also, choosing a character with the same name as the basic character gives more EXP characters. Fodder is consumed by the Ascension process and will disappear from your character list. Cost Ascension And Coin Resource Characters are required to implement Ascension. The required number of coins depends on the rare basic card, number of resource cards and the level of association. Basic Characters 3* and above have Link Slots. Only one Link Slots in The Soul Tree. Link Characters to place in Link Slots. You can't put the same two characters, characters assigned to the team or characters similar to the basic characters in The Link Slot. Characters placed in Link Slots won't go away and you can change character statistics (except FOCUS). You can raise the character's Soul Level by strengthening the Special Soul at Soul. Whenever the level of characters by using ExP Crystals. Their current characters and their rarity. The more character stars have, the rarity and the stronger he is (max 6*). Ascension levels of characters raise their maximum level caps so they can be trained further than usual. Characters can be added a maximum number four times. Status Characters have the following five statistics: The green number on the right shows the overall effect of any Equipped Characters have strong Special Measures that they can use in bold Ouests and Battel. Special Measures cost one Soul Bombs can sometimes be found in damaging objects during the Ouests. Special Step Levels of characters also administer whether a character can unlock Latent Abilities through Transcendance. See here for more information on Transcendance. Soul Trait A Soul Trait A Soul Trait character is one of the abilities that can be improved by strengthening character Links, one character can pass on their Soul Properties to another. See here a list of Soul Properties. Note that the character can have a maximum of two Soul Properties. The Character Link Puts another character in the Character Growth You can boost your character by strengthening it, including it, equipping it with Accessories or putting other characters in Link Slots. See here for more information. Sell Tap Characters here to sell the featured characters have been sold, they cannot be restored. You cannot sell characters set as team members. Lock Tap the Lock button to lock the characters so they can't be used as an Ascension or sold folder. Tap list here to see: The type of character attack button has. The nature of their Soul, List of effects they get from their 6 * skills. Any Accessories or Character Links that have been equipped. Community content is available under CC-BY-SA unless otherwise stated. This guide focuses on all the basic things new players need to know in the Brave Bleach Soul. Aaroniero went over how to pull off banners, character information, games, and more. By Aaroniero Went over how to pull off banners and The First Rate of Things to learn in the Brave Soul Bleach table for banners. There are different Gacha banners in Bleach that you can draw characters from using Spirit Orbs. There are several different types of banners depending on the the time of vear or current events occurring. Most banners stay for about a week give a new banner every week. But some of them stayed for 2-3 weeks at a time. Ordinary banners have a 3% chance of attracting 5 stars but there are special cases. Some banners are released with multiple opportunities or a 4%-5% chance of 5 stars. Then there are the suits of the Steps that are slightly different. Steps is either 50-100 orbs. Each step in step up gives a higher rate for 5 stars. Usually starts at normal 3% and ends either 6% or sometimes 8%. When it comes to attracting characters you can do singles or variety. In terms of 5-star rates, both single and diverse pull-ups have equal chances of attracting 5 stars. There are differences between the two that can determine how you want to draw. A single suit gives you a chance at 5-star per single pull and costs only 25 orbs per pull. The downside is that you can attract 3-star characters as well as 4 and 5-star stars. But the rate is the same no matter what so every chance you have a shot at the 5 star With variety, you have equal opportunities but you spend 250 orbs for 10 characters. The disadvantage for this revolts around the first character in your multi is 4 stars then the next 9 will be 3 stars or 4 stars. You can't get 5 stars in various if the first character is a 4 star. That is a pretty big drawback because you did 10 singles at once but the first quarantees you nothing if it is 4-star. However, it has a pretty good balance as well. If the first character in multiple is 5 stars then you have 9 chances to get another. Once you get that first 5-star 9 characters in turn have the same chance rate to be another 5-star. So realistically you can attract 2 or 3 5 stars in one diverse pull. So it's all up to luck and how much you're willing to spend and risk on the banner. A small side note about your characters. You need Hogyoku to turn 5 stars into 6 stars and Hogyoku Will to maximize 6-star level. This can be covered later but the banner is already in the store so it's easy to accommodate this here as well. In the shop area, you can go to Kon's Corner and spend a friend's eye on pulling the goods. By doing this, you can get crystals, gems, and drops as well as Hogyokus and Hogyoku Wills. So You spend your friend's eyes here when you have stockpile. The development of character and Building the next thing we will talk about is the character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because each character has a high rate of fundamental thing in the Bleach Brave Souls because the brave attack then you want to focus on building that increases the attack more. Every One has a link of the soul that gives a special ability when associated with other characters. But the characters themselves also benefit from this soul link. So, if your character has a normal attack damage of 20% then the damage to their attack increases by 20%. Something to note about attack-based characters is the nature of their soul when you flatten it. You characters, if they have a flurry of soul traits that mean regular attacks they will hit twice on each hit. So if your base attack isn't 2000 damages per hit. The characters with Flurry are built to be attacked by based characters. Those who have Frenzy are strong attack characters who mean they are experts in Spiritual Pressure and 3 strong attacks. Frenzy does the same thing for powerful attacks that Flurry does for regular attacks on the attack construction first and then go into the building sp. The target of the attack is usually known as NAD fostering a stand for the destruction of ordinary attacks. Here is a list of good accessories for NAD fostering. Note, if you match the attribute accessory in the same attribute script. Heart accessories on the character of the Heart, and others, Golden Chappie Dispensers - Reduces SP to 0%, increases all other statistics by 15%/30% Bonus on Golden Pupples Dispenser - FCS Reduced to 0, ATK and STA +15%/30% Bonus for hollow bait - STA -15%, ATK and FCS +15% Wooden Sword (And any other combination of special accessories) - Reapers soul and Captain get 10% regular attack damage / 20% Bonus attributes This accessory is all good for wearing NAD-based characters and will give them the best overall benefit, Next, we will go to the best accessories for sad character, Golden Yuki - FCS deductible to 0, SP and STA +15%/30% Bonus attribute Hunting Cap - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus -Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%/15% Fortificati +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%, Spiritual Pressure +7.50%/15% Fortification Pill Attribute Bonus - Attack +7.50%/15% Fortification Pill Attribute Bonu damage / 20% Bonus Attributes When it comes to accessories you can get back a 5-star accessory for secondary effect. You want to aim for Attack and Spiritual Pressure but we're not going to go over rerolling because it's more mechanical going forward. In addition to accessories, there are also script linkages that allow you to define other characters and benefit from their Soul Link. So, if you specify a script with 3 characters that Common attack damage links are added 20% then they will get a 60% boost from all 3. And if the character also has a NAD plus 20% that clinchs up to 80%. So character accessories and links are very important when building characters. Now, a small thing about flattering character. Be sure to level and maximum all the character whether it is a 1 or 6-star star. Each gives different value and they all add 1-Star = 5 Orbs 2-Star = 10 Orbs 3-Star = 25 Orbs 4-Star = 35 Orbs 5-Star = 50 Orbs 6-Star = 75 Orbs So make sure you benefit from this orb by maximizing each character you get. You don't want to miss out on this orb opportunity. Accessories One important thing about accessories flatters them and grows them. To flaten your accessories, you can feed them other accessories to gain experience. You can also give them Power Hearts which are items specifically created for leveling accessories is maximized, you can grow. 3-stars and downwards

can grow by combining two same-star ranks and stage accessories. 4 stars can be evolved with Evolutionary Powder and Secret Book based on attrition. This is available through certain quests in the game. 5-star accessories are no nose you want to have because they can have 2 effects on them. So on top of their basic effect, you can have an Attack of +15%/30% or Spiritual Pressure +15%/30% or Spiritual Pressure +15%/30%. Accessories can be difficult to manage. To get it, you can pull from the in-store accessory its from an accessory or ticket machine or get it, you can pull from the in-store accessories machine or get it, you can have an Attack of +15%/30% or Spiritual Pressure +15%/30%. Accessories can be difficult to manage. To get it, you can pull from the in-store accessories machine or get it, you can have an Attack of +15%/30% or Spiritual Pressure +15%/30%. Accessories can be difficult to manage. To get it, you can pull from the in-store accessories are no not pot five and not possible to the power of the actual game itself are divided into several different parts.
