CaptainReviews Asus Laptops August 2, 2015 4092 Views This Asus T100TAF-B11-GR mid-level laptop that is great for your everyday home computer needs, including watching movies online such as Netflix, visiting social media networks like Facebook and being able to communicate with friends and family online through programs such as Skype and more! However, if you're looking for a laptop with a spacious hard drive for storing files, we don't recommend the ASUS Transformer Book T100TAF-B11-GR 10.1 Removable 2-in-1 HD touchscreen laptop - Intel Atom/1GB of RAM/32GB of eMMC/Windows 8.1/WiFi/Bluetooth/web-camera-grey-certified repair. If you need to write your work book, catch up at work or create a family budget, this Asus T100TAF-B11-GR mobile laptop allows multitasking with 1GB LPDDR3 and a mid-level Intel Atom processor No3735 1.33 GHz. Although, if possible, we recommend upgrading the memory system down the road with at least 2GB, which will help increase the laptop's speed and multitasking abilities. Why choose between a laptop and a tablet? Why not get both? The amazing ASUS Transformer Book T100 is a beautiful ultra-portable laptop that is also a 10.1-inch Windows tablet. Unplug the tablet to work and play anywhere, and dock to enjoy a handy keyboard, smart gesture with support ... This review is from: ASUS Transformer Book (T100TAF-B11-GR) 10.1 Removable 2-in-1 HD Touch Laptop - Intel Atom / 1GB of RAM / 32GB eMMC / Windows 8.1 / WiFi / Bluetooth / webcam - Gray (certified refurbished) (personal computers) Is a good 2 in 1 tablet for almost everyone, who doesn't plan much more than schoolwork, or for business. It has a processor that works well enough to use most programs, but I wouldn't recommend it at all for gaming. I wanted one for Reasons: 1). I take photos often, and I find that the mouse and keyboard don't work well for higher-level editing, and the touch screen helps a lot. And 2). I'm writing a book and wanted a portable tablet that I could bring wherever I go. It works very well for this; Battery life allows you to use it for a long time without having to plug it in, and the keyboard is good enough to write (though not ideal). Good:-Long battery life- Very portable enough a good processor for small things high quality display (though not very bright)Bad:-While the speakers are good, they are also placed on the back of the screen, which can irritate sometimes.-Touch pad not all that ... Basically, it's an affordable 2-in-1 laptop/tablet PC hybrid with a removable keyboard. The 10.1-inch T100-series and T100TAF-B1-MS Signature Edition are all based on the Intel Atom Bay Trail family processor and come with 2GB of system memory. This setup is satisfactory for daily chores, multimedia playback, and some games on low settings, but not much more than that. You can read a detailed review of the Bay Trail atom here. Along with the quad-core Atom s3735F processor, which is powered at up to 1.86 GHz and 2GB of RAM, this model comes with 32GB of internal storage. This is the smallest capacity in the T100 series, and because of this you can crash into some storage restrictions. At the very least, you can expand the storage space through the microSD card slot. The 2-in-1 is also available in the 64GB option and with an extra 500GB hard drive in keyboards on some models. The display is a mixed bag in terms of specifications. The resolution is a mediocre 1366×768 pixels, but IPS wide-angle review technology is present, which is a major plus. The keyboard has Chiclet-style keys and is unlit. The dock also includes itself trackpad and full-size USB 2.0 port. Part of the tablet has a micro HDMI video output, a micro USB, and an audio socket combo. There are also Wi-Fi and Bluetooth connections, stereo speakers, and a front-facing webcam. The device as a whole weighs 2.5 pounds, while part of the tablet weighs 1.3 pounds. Battery life is up to 11 hours, according to Asus. As for software, the Asus Transformer Book T100TAF-B1-MS Signature Edition 2 in 1 PC runs Windows 8.1 and comes with a 1-year subscription to Microsoft Office 365 Personal. The Signature Edition means that the computer is clean of unnecessary virus software and has a free antivirus program pre-installed. The same device is available without the Signature Edition sign. This is the T100TAF-B12-GR with the same hardware specifications and Windows 8.1. Another model, the T100TAF-B11-GR, is slightly cheaper than the previous two. However, it should be avoided because it only has 1GB of RAM, making 2-in-1 barely used.
