## Discord music bot commands mee6

Discord music bots provide a way for multiple server members to listen to the same music at the same time. Discord music bots can find songs on YouTube, Spotify or other platforms and play them on a discord voice channel. If you join a voice channel, you can listen together. This provides a great way to share new music with friends, have fun listening to hosts or providing background music. However, with so many different discord music bots available, it can be difficult to know which one to add to your server. If you need help with this decision, then this article is for you. Read on to compare the top 5 discord music bots. You will also learn how to play music at Discord and how to add music bots to Discord. Choosing the best discord music Bot1. GroovyGroovy is a popular discord music bot, and there are various Groovy bot commands. With the Groovy music bot, you can play songs via site links or file uploads, or search for specific songs. You can also create a queue for songs. Within this queue, you can skip songs, return to previously played songs, jump to a specific song, clear the queue, shuffle or loop a queue, or a specific song. Finally, you can look at the lyrics to the song. You can also pay a Groovy bot premium to access multiple features like volume control, audio effects, saved queues, and 24/7 playback. The premium costs \$3.99/month for one server.2. OctaveOctave is another popular Discord music bot with free and premium features. The Octave Discord bot can play songs from YouTube and Soundcloud, form queues, and even create playlists that you can listen to again later. Within queues and playlists, you can skip songs, vote as a server to skip a song or not, jump to a song, and stir. There are also playlist-specific commands that allow you to create, delete, or edit playlists or upload playlists from another site. You can also search for lyrics for your song. The Octave premium bot unlocks volume, filters, bass boost, unlimited custom playlists, and longer song lengths and queue sizes. For \$5/month, you can get the above on one server along with 6 hour path lengths and a queue size of 500. For \$10/month, you can get a premium on two servers with 12 hours of track length and unlimited queue size.3. HydraHydra is a new music bot for Discord with a large selection of streaming platforms. With the Hydra Discord bot, you can stream songs from YouTube, Soundcloud, Spotify, Deezer or Bandcamp. You can also upload audio files to play or stream online radio. Hydra allows you to create playlists and playlists, vote, loop, move a song within a queue, or to the top of a queue, mixing, or repeating songs. You can also search for lyrics or song information. Finally, Hydra includes administrator-only commands that allow you to publish which song is playing, change the inclusive language, prohibit certain users from using the bot, limit how when a song can be played, limit Hydra to certain voice channels and set who DJs bot and controls the queue. Hydra premium adds volume control, audio effects, 24/7 playback, and unlimited playlists. You can purchase Hydra premium for the user or for the server. The user premium allows you to use Hydra premium features on any server on which you are a member for \$1.99/month or \$19.99/year. The server premium includes the same features as the user's premium along with the option to unlock all premium features for the server of your choice. It costs \$2.99/month or \$29.99/year for a single server.4. ChipChip is the best free music bot for Discord. It includes the same normal commands as other music bots, allowing users to play songs from YouTube, Vimeo, SoundCloud, Mixer, Twitch and Bandcamp and create queues. You can skip, loop, mix, move and play songs in order. You can also quickly move to a certain part of the trail. Chip also displays song lyrics and can create .txt a file listing all the songs in the queue. Best of all, Chip includes sound control features for free! With Chip, you can use bass boost, equalizer, treble boost, vocal boost and change the volume of the song. Finally, you can use Chip to listen to the radio; The bot includes a list of 180 stations from around the world to choose from. The chip also includes premium features, although unlike other bots, all basic features can be accessed for free. The chip premium costs \$5/month and allows you to use 24/7 modes, bypass voting locks (so you can change audio effects without having the rest of the channel voice on it) and ignore command cooldowns (so you can use the same command over and over again).5. MEE6MEE6 is a premium discord moderation bot, but did you know it can play music on Discord as well? The MEE6 music player is unique in that you can use the visual player on the dashboard to control your music. Instead of entering a series of commands on the server, simply hop on the network dashboard to see the queue, manage playlists, and search for, play, and play songs. You can also control volume, record voice channels and play music 24/7. MEE6 supports music from YouTube, SoundCloud and Twitch. The bot also includes an entertaining music quiz that lets you challenge your friends to see who can hit the song and artist from the clip the fastest. However, the above features are only available on MEE6 premium. You can purchase a lifetime plan for one server for a flat fee of \$79.90. Or instead, you can buy a monthly plan for \$11.95/month. You can also save money per month by purchasing or a one-year plan. Which discord music bot is best for me? The answer to this question will depend on what you need, as each music bot includes unique features. MEE6 is the easiest to use with its music dashboard, although you'll have to pay for access. Chip is the best free music bot because it is the only one that provides sound sound Free. Hydra and Chip provide the widest selection of music streaming platforms with as well as radio. Specifically, Hydra is the best Spotify bot for Discord. Hydra also includes the best administrators that allows you to decide who can use the bot and which channels it can access. Groovy and Octave are more basic in terms of features, but remain popular because of their ease of use and stability. Since Groovy and Octave have been on Discord for some time, they are unlikely to be ruled out. How to add a music bot to discord You can add a music bot to Discord in the same way you would add any Discord bot. Simply find a bot on your website or a list of bots top.gg, invite it to your server and authorize its commands. For more detailed instructions, see the video above or see our article How to use Discord Bots. Discover More Cool Discord BotsDo want to discover more bots? Check out our other bot lists for the best bots for businesses, the best moderation bots and the top 10 Discord bots for any server. MEE6 has an add-on for streaming cool music on your server in a very simple way. It only takes one command for a bot to join you in a voice channel and start your favorite music... and for the coolest of you, you can use your dashboard to manage everything without opening Discord! Play great musicThere are a few commands that you can use to play music: !add followed by the name of the music or the link will add the song you specified. It is even possible to add a radio station using the original URL! In fact, any original URL can work if it does not require login. Oh and search by terms is just YouTube.! The game can be used with or without search terms. If you use it with, it will work as !add a command, but if you do not specify any song MEE6 will join the voice channel and immediately start playing order.! Search is used to search for music based on keywords or names. MEE6 will offer you 10 different music choices based on what's most popular for the word you've listed, and you just need to select the appropriate number from the list to add it to the queue right away!! repeating while listening to a song will put that song back where it started. Something like !seek 0.Pro-type: With the search command !, if you add them all in response, you will add several numbers. Now you can test different versions of the same song, isn't it super cool? Moderate voice channelsSome commands will be useful for managing MEE6 in your voice channel, so your great music entertainment stays great.! join or !leave will ask MEE6 to join and leave the voice channel. (The !join command will not automatically start the music, you must use the !play command to do so)! skip is used by administrators or you have as a permitted role, to skip to the next song in line without asking others to vote.! clear row immediately and !reversibly deletes deletes queuing music. This is useful if someone is having fun spam commands to add a bunch of songs.! stop works as a command !leave, just asks MEE6 to leave the current channel. The party's over, the volume followed by a number between 0 and 200 changes the volume of the bot, between 0 and 200% of the given volume. Unlike the Discord key, this volume is the same for the entire server. Keep control of what's going on!np shows you the music that's currently playing, with a clickable connection and even the current position of the track. Stay in check!! pauses music temporarily and !resume restarts it... pretty simple, I guess. Seek allows you to return to a specific point in music, following the classic MM:SS (minutes and seconds) format. Keep your favorite parts handy.! previously restarts the previous record. If you think it was better before. In this plugin there are other commandsOther commands, here's what they do:!vote-skip allows your members to vote to skip to the next song in line. You can manage the roles that are allowed to be used through the server dashboard, but remember that at least half of the members connected to the voice channel are required.! The order shows the music currently being played, as well as all upcoming music. And with clickable links, so you can see what it's all about online. Here are some examples of how !queue and !vote-skip works: Our cool Music ControllerControl, located on your dashboard, lets you manage music on your server from any web browser. Here you will find:Music currently playing and selected voice channelButtons to pause, restart or skip trackA playlist of upcoming music An easy way to add songs from the YouTubeOne button to play the current playlist in a loop, another one to maintain MEE6 in your channel even when everyone is gone (24/7 mode)!If you have any problems with the plugin, do not hesitate to join our support server # Punned to: 15 / 11 / 2019 2019
