March 13, 2020For someone who never used a sewing machine I was intimidated at first. There are written instructions and step by step illustration on the machine. I was able to get my first project started in 10 minutes of unboxing. I will be advised to get your starting item at the time or purchase (stabilizer, different color wire, based adhesives, etc.) these items are not included with the machine. Useful? December 2, 2018I's I'm very new in emperor and this car actually intimidated me. I I didn't let it get the best of me lol. I would consider myself a very criticized person. This machine has definitely improved my creativity. Don't just jump right in using this machine if it's your first time to be empowered. Take time to learn and educate yourself and you won't be disappointed. I've got a few user errors and I'm sure I'll have more because this is all so new but the troubleshooting and reading the manual owners definitely helped me. I can't wait to start making my girls custom made shirts as well as personalized gifts for family. The digital screen is easy to read and use. The USB feature works really well and I was able to transfer several designs on. In general it's very user friendly and I'm glad this was my first car because I couldn't picture anything different. [This review was collected as part of a promotion.] Written by a customer brother-usa.com client. Useful? December 3, 2018This is my first embarrassing car with the manual that Brother included was incredibly useful for getting everything up and running. The machine itself is wonderful and relatively easy to use, once you learn how to set everything up. It comes preloaded with drawings of drawings and the touch screen making it easy oriented and drawing size on your fabric. The USB feature makes it easy to transfer designs right to the machine without the hassle of first connecting it to a computer. I've used this car for several small projects and can't wait to continue with it! [This review was collected as part of a promotion.] Written by a customer brother-usa.com client. Useful? November 29, 2018I has searched for a long time for an embroidry machine and decided on this Cool PE800 and is the best decision ever! The possibilities are enduring with this machine. The program is very user friendly and does take some time to learn all the tips and vans but so worth it! I can make monograms for my kids and even school logos for their hairbows! This is worth all dollars and will save me a lot of money in the long run. [This review was collected as part of a promotion.] Written by a customer brother-usa.com client. Useful? November 29, 2018I never used as much as even a regular sewing machine before so I was a bit intimidating at first. But I went online and watched several unboxing videos and how they are in on the Cool PE800. After reading the manual and carefully takes my time to set up the machine I was excited to try my first try to enlist. I first made a short name Dad. It was easy to follow the prompts on the screen and watching all the hard work of gathering the unity together was both fun and exciting for me and the kids. It took less than five minutes and it did. It was perfect! We couldn't wait for us to do another. My son chose a pillow as he called him, quickly started on that next. Again in less than five minutes we had an adorable adorable terrace with beautiful detailed toe. We made them in the white thread that included on some black material we've put around (pictures included) the detail is amazing and we can't wait to see what else we can do when we get the wire we ordered in an array of colors. If you're looking for an embarrassing car and think you don't even know how to sew (like I thought) don't hesitate this car is scary and you'll love it! I will and have recommended the Pe800 brother to all my friends and family. [This review was collected as part of a promotion.] Written by a customer brother-usa.com client. Useful? Customer Q&AGet specific details about this product from customers who own it. Does this car come with a props package? by GGApril 17, 20202 Answer1. No, this machine does not come with a props package. Useful?2. The PE800 comes with accessories to get you started with machine except the top wire embroidery.
