Open up new opportunities for ICT in its class with google access brain power from around the world Look at what's waiting for you in the night sky An easy way to learn languages Make Your Smartphone Samsung suitable for kids Identify celebrities in sky mods download minecraft 1.7.2 All the handouts and books you need in one place Socratic has a suggestion to bring support in math, science, history, English, economics and more using your mobile phone camera to scan and would like to know more about it, such as a term or design. Unfortunately, that's not how it works in practice. To get started, open the application and there is a tutorial and or some explanation of how to use. In addition, unlike the application page, which is all the way in Portuguese, it offers only answers in English - so there is no point in taking images of words in our language. To make matters worse, the camera crashed several times, as did the software itself, and was only able to accurately recognize calculations and mathematical elements. Although theoretically it is a very useful tool, Socratic did not work as promised. More features also didn't have a few other features that could make all the experiences more useful and practical: integration with cloud files, a dedicated interface for every area that can be solved - math, Portuguese, literature - and even a bridge to sharing on social networks. Any problems with mathematics or biology? Questions about history? So if you download Socratic through Google for Android you can solve any doubts of your research with just one photo. It turns out that this application uses a mobile phone camera to search the Internet for a solution to the subject being photographed. Find the solution of any subject Here we have an application compatible with any discipline: mathematics (calculus, statistics, algebra, trigonometry,...), biology, physics, history, economics, English... To do this, you use artificial intelligence (AI), which is able to identify concepts that will help you solve your question. Solutions are displayed step by step and offer various online and real-time resources, if applicable, such as compute operations. It also has various features that help the user better understand where the solution to the problem is. Problem.
