This time is an extremely new obstacle course game. Instead of jumping or moving over obstacles, you have to build stairs to pass and finish. GameplayYour mission in Stair Run is to move on colorful paths, collect tiles on the way to a basket on your back and use them to build stairs on obstacles. Don't be afraid of being heavy or the basket is too small, your goal is to collect as many tiles as possible. The more bricks, the more they are piled up in the basket. The protagonist is very strong, he can carry a number unlimited. As an interesting arcade game, the controls of Stair Run are not so complicated. You just need to touch the screen to start playing, press long on the screen to build stairs to overcome obstacles. The game in voodoo's gameplay is Like that. Easy to understand, easy to play but not easy to win. Overcome obstacles, reach the finish line to receive rewardsThe obstacles in Stair Run are mostly red. So it is best to avoid all the reds. It consists of high and low mountains, skyscrapers or nail mats. If you hit them, you will be repelled and drop some bricks. If the number of tiles is exhausted and you don't overcome the obstacles, you lose. However, obstacles do not necessarily hinder the player. Sometimes it's just the abyss that if you fall, how many bricks you have is pointless. This means that you always have to build a staircase high enough to cross the abyss. In addition, along the way there are useful items such as coins, spring mattresses to help you overcome obstacles without building stairs. When you overcome all the obstacles and reach the finish line, the remaining bricks help you climb the corresponding high steps. This is the corresponding meath of how much you earn. If you reach the top of the tower, you get a treasure chest with lots of gold coins. Some tips you might needVoodoo Games are always simple and entertaining for players. But sometimes it is so difficult that it makes players angry. So some of the following suggestions will help you play the game more gently without affecting the value of the game. Don't just follow the easiest path. You can see the roads above with more bricks and fewer obstacles. There are even many gold coins appearing. Don't build constantly. Once built, your character will jump forward a little. So please build in an interrupted way and then continue to build. That way you can cheat a little space and save bricks. You can completely build stairs in the air. Just got enough bricks. Let's ignore the usual principles of physics! And the most important thing is the correct time for your character to pick up the most bricks and not let you accidentally touch the obstacle and drop some bricks. Graphics Like many other Voodoo games, the graphics of the game are not so prominent. Your character is just a colorful dummy. The details are just simple shapes with eye-catching colors. Even physical elements are sometimes contrary to reality. You can build stairs in the air or like endless stairs without frames. However, it is not necessary to be true to reality to bring joy. Relaxation, fun sometimes comes from the simplest things! MOD APK version of stair RunMOD featureNo Ads: VOODOO of the game has quite a lot of ads. If you don't want to be disturbed, you can use our version of APK MOD. Download Stair Run MOD APK for Android In general, Stair Run is similar to other regular Voodoo games. Even gold coins are just rewards and have an upgrade or unlock system. The main purpose of the game is to help players relieve stress and reduce stress and fatigue. Not too prominent, but I believe you'll need it at some point in yours
