Wisconsin emissions testing extension

Federal law allows the owner of a vehicle to request an extension of the time limit for testing his vehicle's emissions due to various mitigating circumstances. Appropriate, as well as current documentation, must be submitted with proof to the Satisfaction of the Commissioner that the vehicle is not able to be checked at the time of the scheduled inspection, and 30 days thereafter. Acceptable out-of-state reasons: Connecticut residents with out-of-state vehicles at the time of their scheduled test date, and 30 days thereafter can apply for a one-off extension of six (6) months. Please note that multiple time extensions will not be granted for the same vehicle, unless the criteria apply to military or out-of-state students. Students attending school and staying outside Connecticut: If you attend a school, college or university outside of Connecticut, you can apply for the six-month (6) month extension more than once. However, you will be asked to reapply each time and MUST provide an up-to-date identification on the school stationery confirming your registration. Active military personnel: Vehicles located outside the state, and belonging to Connecticut residents, who are on active military leave can apply for a twelve (12) month extension more than once. However, you will be asked to reapply each time and MUST provide a copy of the active military orders or military ID that will be submitted along with the application. Both are acceptable. Requirement for out-of-state active military: Copy of active military orders or military ID, and the OUT-OF-STATE VIN VERIFICATION FORMAT (AE-81). Reciprocity check: You may be entitled to receive a reciprocal test if your vehicle is in or near an approved jurisdiction. This means that vehicles registered in Connecticut can be tested in one of these jurisdictions that comply with Connecticut's testing requirements. Please note that the mutual test inspection must have a successful effect. Please note that a reciprocal test will be honored ONCE, unless the criteria apply to military or out-of-state students. If your vehicle is eligible to undergo a comparable emissions test in one of the approved jurisdictions, you can apply for a one-time extension equivalent to the two (2) years your vehicle will receive in Connecticut. However, some of these jurisdictions may NOT be able to meet your vehicle's testing requirements and, in some cases, emissions tests be limited to specific counties or regions. For more eligibility information, make sure you check with the competent jurisdiction before attempting an emissions test. If you are not clear about the type of test your vehicle requires or if the reciprocal test applies to your condition, please call the motorist hotline at 1-888-828-8399. To see additional information on mutual testing and and or print the current list of approved jurisdictions click here. Documentation All requests for an extension of time are subject to review and approval by the Connecticut Department of Motor Vehicles. Please provide the following documents to the DMV address below: • All requests must include: Written request with the contact details of the vehicle owner, including name, out of state and Connecticut mailing addresses and phone number. • In addition to reciprocity, all requests must include: OUT-OF-STATE VIN FORM VERIFICATION (AE-81), completed and signed by an external state law enforcement authority (military, local, or state police, or DMV authority). • Requirement for reciprocal testing: If you are trying to apply for full compliance of two (2) years with the vehicle test in another jurisdiction, you must include the Vehicle Inspection Report (VIR). Please note that the vehicle must be in transit mode. if the vehicle has failed, it must be repaired. OUT-OF-STATE VIN VERIFICATION FORM (AE-81) is NOT required for reciprocal testing. • Requirement for out-of-state students: Documentation proving current enrollment in school, college or university, on school stationery, and the OUT-OF-STATE VIN VERIFICATION FORM (AE-81). • Requirement for out of state active military: Copy of active military orders, and the OUT-OF-STATE VIN VERIFICATION FORM (AE-81). • Requirements for out-of-state (non-student, civilian): OUT-OF-STATE VIN VERIFICATION FORM (AE-81). Under Repair (accident): If your vehicle is in the process of repair due to an accident, you can apply for a time extension by forwarding the following documents to the following address: • Police repair report and account, with the appropriate dates indicating that your vehicle is not available for testing at the scheduled test date and 30 days thereafter and the estimated date of completion of the vehicle repair. • Repair bills must be on repair company stationery. Submission of time extension applications or reciprocity check All requests for time extensions are subject to DMV approval. Do not submit a reciprocal test completed another jurisdiction that is in a state of failure. Reciprocal testing inspections must have a successful effect. Send all documents for time extensions or completed tests to: Department of Motor Vehicle Emissions Division 60 State Street, Room 115A Wethersfield CT 06161 You can also fax application documents to: (860)263-5561 or (860)263-5571. If you have any additional questions about time extensions, contact the DMV Emissions Department at (860)263-5333 or (860)263-5611. Emissions tests -- They are performed by businesses open until 5:30 p.m. on weekdays, and until 12:00 p.m. on Saturday, no appointment is required. Which vehicles require testing? The Wisconsin Department of Transportation (WisDOT) (WisDOT) vehicle owners when an emission test is required. We notify with the renewal notices of the vehicle registration we send and at the time changes of ownership of the vehicle. Vehicles require an emissions test based on: Vehicle location Vehicles typically maintained in one of the seven southeast Wisconsin counties of Kenosha, Milwaukee, Ozaukee, Racine, Sheboygan, Washington and Waukesha. Some Autos vehicles and light truck models from 1996 to 2006 have a gross vehicle rating of up to £8,500, not including diesel vehicles. Cars and light trucks models in 2007 and later that have a gross vehicle rating of up to £14,000, including diesel vehicles. Some regular cases After transfer of ownership (transfer of plates or new plates issued). After the first registration in Wisconsin. Before renewing the registration (two-year check, see below for details). Some non-regular cases When emission equipment is found to have been tampered with. When identified with fraudulent vehicle location information. Government vehicles when designated by the department. Exempted vehicles The following vehicles are exempted from emission requirements (excluding vehicles found to have falsified emission equipment): Vehicles manufactured before 1996. Vehicles manufactured after 1996 and incompatible with OBDII (must be verified at a test station). Diesel vehicles with model year 2006 and earlier. Motorcycles and mopeds. Vehicles with a registered gross weight of more than 14,000 lbs. Trucks with farm records. Electric vehicles. Note: Hybrid vehicles (using both electricity and petrol or diesel) are subject to emissions control. Non-motor vehicles. School buses and human service vehicles with a capacity of 16 or more people. Vehicles classified as special design vehicles, Medal of Honor and distributed plates. When tests are required before the registration is refreshed. Vehicles require an emission test every two years before the registration plate is renewed, beginning the third year after the vehicle model year. (For example, vehicles of the 2008 model year first require a test in 2011.) Refresh notifications indicate whether a test should be submitted (see sample refresh notification). The vehicle must pass the emission test before renewing the classification. Failure to carry out the test prevents the issue of the annual sticker, which makes it illegal for the vehicle to operate after the end of registration (plate). If you posted your renewal without passing the emissions test, take your vehicle to from the test stations. The DMV will automatically receive successful test information and issue the registration and sticker. Your registration and stickers should arrive within a week to 10 days. No test shall be required if the vehicle has passed a test within 180 days of the expiry date of the registration. You can check if your vehicle is going to be within the next 180 days with the introduction of your license plate on the WisDOT dish research page. If the survey results page includes the Require instant messaging test statement, your vehicle must be tested (IM = Inspection Maintenance). You do not need a renewal notice or letter from WisDOT to test your vehicle. Just visit the emissions inspection site and bring one of the following with you: Wisconsin Registration Certificate title Previous Inspection Report Letter from Department MV2016 (Substitute Renewal Notice) After transfer of ownership. Vehicles over five years of age require testing within 45 days after a change of ownership. WisDOT sends a letter to the owner explaining the test requirements. Failure to test within the 45-day period will result in the suspension of vehicle registration. No test shall be required if the vehicle has passed a test within 180 days of the transfer of ownership. After enrolling in Wisconsin. Vehicles previously registered and registered out of state and over five years of age require testing within 45 days of receiving the Wisconsin registration. WisDOT sends a letter to the owner explaining the test requirements. Failure to complete the emission requirement within the 45-day period will result in the suspension of the vehicle registration. Read the WVIP vehicle emissions test process for more information. About the Wisconsin Vehicle Inspection Program Why Vehicles Are Being Tested The Federal Clean Air Act mandates the operation of vehicle emissions inspection and maintenance programs in areas across the nation with significant air quality issues, including Southeast Wisconsin. In addition to identifying vehicles that violate state emissions standards, the Wisconsin Vehicle Inspection Program (WVIP) also identifies vehicles with altered emission control equipment. Owners of these vehicles must have tampered with items that have been repaired, replaced or otherwise returned to the appropriate working order. Motor vehicles are an important source of air pollutants in metropolitan areas. Vehicle exhausts contain carbon monoxide and other pollutants -- volatile organic compounds and nitrogen oxides -- that react to form ozone at ground level. Motor vehicles emit about a third of southeast Wisconsin's volatile organic compounds (mainly hydrocarbons) and about 60% of carbon monoxide. Program Information The Department of Natural Resources (DNR) sets emission standards for WVIP, and WisDOT manages the program. WisDOT currently contracts with Systech International to conduct vehicle emissions tests. WisDOT checks inspection equipment and procedures at each inspection location to ensure accurate results. The required inspections are free for the driver, as are the first two re-ins (if necessary). Subsequent inspections, as well as voluntary inspections, cost \$15 each. Teh Teh carry out around 650,000 inspections per year. Questions? Contact: Wisconsin DMV Http://www.dot.state.wi.us/drivers/vehicles/im.htm
