## Spiderwick chronicles books reading level

I really need to start reading again. Different people tell me this at least once a week. I get it: life happens, you're busy, things pile up. But also, every time someone says this to me, I have the urge to stop whatever's going on, drag them to the nearest library, and find them a book that will knock their socks off. I think there is this perception that to be a reader you have to fit a certain profile. You have to read serious contemporary literary fiction with big words and lots of pages. You have to be dedicated and spend hours a day with your head bowed over the novel. You have to drop your entire salary at the local bookstore. It's all super, very fake. If there's anything I want to do with my career, it's to shatter the myth of The Ideal Reader. There are books out there for everyone, whether it's the steampunk giraffe romance that makes you turn the page or the latest Mary Higgins Clark novel. Do you read in large chunks or you sneak a few pages at a time on your lunch break. Whether you bought your book from your local indie bookstore, or you checked it out for free from the library. Everything matters. Here are some books that will draw you, light a fire under you, and maybe even collide with some of your other passions. You want to start reading again? Just do it!1. The Time Traveler's Wife by Audrey NiffeneggerClick Here To Buy This is a book that will take you and not let you go. The story of Henry and Claire, a uniquely starry couple. For most of his life, Henry had uncontrollably and unexpectedly traveled through time. As a result, her relationship with Claire has stretched a strange timeline since she was 6 years old. It's an intense journey through and through as the two try to cut through life together. Persepolis by Marjane SatrapiClick Here To BuyGraphic novels is a great way to pick up the story, especially if you feel you don't have the brain for many words on the page. This in-depth graphic novel memoir tells the story of a young girl who grew up in Tehran during the Islamic revolution. You will be drawn into Satrapi's story in an instant.3. Let's Explore Diabetes with An Owl by David SedarisClick Here To Buy Sedaris essays will make you laugh out loud. With his sharp humor and strong personality, Sedaris will make you feel like you two are sitting together in a bar, a little thin, trading story. The book contains everything from his first colonoscopy to his absurd experiences living in France during President Obama's election.4. Guy in Real Life by Steve Here To BuyDo you game more than you read? Whether you enter a videogame or a table, this book is for you. Svetlana is a unique nerd who loves tabletop RPGs. Lesh is a metalhead who has found himself obsessed with World of Warcraft-style MMO online. When the two really collide and begin to grow friendship, friendship, finds herself secretly pretending to be Svetlana in her videogame universe, raising questions about gender and identity. Amazingly, several chapters are told through the perspective of The Characters Lesh and Svetlana in rpg respectively.5. Aimee BenderClick's The Girl in the Flammable Skirt Here To BuyIf you feel like the novel has too much commitment, then the short story has your back. Aimee Bender is one of the best short story writers out there, with an unsteady imagination and a dark sense of humor. He has a knack for pushing past the boundaries where you think stories are allowed to go. This book will feel like a sour journey, in all the best ways.6. Peeps by Scott WesterfeldClick Here To BuyVampirsim is STD, and it's Cal's job to fight it. As carriers of the disease, the plus side is that Cal has superpowers; Her weakness is that all her boyfriends in the past year have turned into vampires. Now, the mysterious power seems to be on the rise, and Cal is right in the thick of it. Set in the revolving world of NYC, Secret, Peeps is an original, fast-paced, and weirdly funny book that won't connect you like no other. Picture: Bonnybbx/Pixabay Follow the latest daily buzz with the BuzzFeed Daily newsletter! For some, there is no greater pleasure than settling in a comfortable chair, opening up the stiff spine of a new book, and diving into a different world. Books open up infinite possibilities and pleasures, but unfortunately, reading is entertainment that involves fewer people. If you're like most Americans, you haven't picked up a book at all this year, and it's even more likely that if you do, you don't finish it. The results of a poll released by the Associated Press and Ipsos show that one in four Americans reads no book at all, and half of Americans read less than four each year. Although the decrease in time spent on reading is depressing, what is more depressing is our declining ability to read. According to the Oxford Journals, the average American's reading ability hovers around the eighth or ninth grade level, and the UN Chronicle reports that up to 25 million citizens cannot read or write at all. The United States is ranked 21st in the world for literacy. Number one in terms of national literacy? Cuba. What's even scarier is that according to a report published by Renaissance Learning, the average reading ability of our high school graduates is in fifth grade. The benefits of Reading in today's busy world, picking up a book may seem like it's not worth the time. However, reading offers countless benefits: 1. Reading Your brain The average American spends five and a half hours every day watching TV. While television can be entertaining, it does little for your brain or for your body. You actually burn more calories reading a book than you do watching TV. Tv. is an active mental process: you think more, use your imagination, and you increase your knowledge. 2. Reading Expanding Your WorldView, I never really walked through the dusty village of Mali. I wasn't born into plain Indian life in the 1800s. And, I've never walked along the rainy, dark streets of Paris with a hungry stomach and nothing in my pocket except notebooks and blunt pencils to write my next story. However, I have experienced all these things through the wonders and mysteries of the book. Books allow you to experience other people, other places, and other cultures that you may never have been exposed to in ordinary life. It helps you develop compassion for suffering, empathy for those who are different from you, and an open mind. 3. Book Build Focus When you read magazines, you jump from image to caption to story, page by page. While reading a website, you are constantly distracted by moving your urgent ads and links to your next site or story. Although each reading is useful, the book helps you develop the ability to focus and concentrate as there are no distractions – there are only stories. In addition, reading helps improve your memory. 4. Reading Makes You Interesting The brightest and most creative minds in the world have written millions of books, sharing their wisdom, all of which are just waiting for you to pick up and discover. The more you read, the more you have to talk about with your colleagues, friends, dates, spouse or partner, and complete strangers. Reading gives you a rich store of knowledge, ideas, and experiences that you can then share with others. 5. Reading Helps You Learn I teach myself how to start a business by reading a book. I have learned about yoga, Buddhism, American history, mythology, and many other interesting subjects through reading. Reading is a very cheap way to learn new skills and concepts. Instead of attending classes and paying for overly expensive tuition, or instead wishing you knew how to build a blog or software program, teach yourself through books. Reading empowers you to take responsibility for your education, no matter how young or old you are. How to Read More Sit down to read doesn't mean you have to carve out an hour or so of your day. There are many ways you can sneak more reading into your life: 1. Cancel Cable TV I canceled cable TV many years ago, and I must say I didn't miss it one bit. Watching less TV is a very easy way to open up time to read more. I often use the night read, and that was my favorite part of the day. If I still had cable, I might otherwise be flipping through channel by channel, looking for something to watch. 2. Investing in Tablet Devices According to a Pew Research study, and published on NBC News, 30% of study respondents who had a tablet or e-reader said they spent more time reading than they used to. They also read more books: The average tablet read 24 books per year, compared to other readers, who read an average of 15 books per year. I have an Amazon Kindle, and I love it. One of the biggest benefits of owning a Kindle is that Amazon has thousands of books, most of them classics, available for free download. This is a very easy and inexpensive way to get quick and portable access to the best books in the world. Another benefit of e-readers is that they are small. You can take your entire library with you on a plane, train, or in your wallet. You can read during your morning trip, while you queue at the grocery store, or wait to pick up the kids from school. E-readers make it easy to fill small pockets of time by reading instead of staring at space aimlessly or checking Twitter on your smartphone. 3. Choose a Book or Genre that Interests You Do you know how many times I have taken War and Peace and tried to read it? At least a dozen. This is one of those books I feel I should read, but I can never get into the story no matter how hard I've tried. Sometimes you're just not ready for the book, or the book isn't ready for you. Maybe you're not old enough, or you're not at the right point in your life. You may not be destined to cross paths at all – and that's fine. So don't make yourself read a book you're not interested in just because you feel you should read it. Start with books that interest you – you'll get more fun and value from the experience. If it feels like a chore, then you don't do yourself a favor. 4. Set a Time If you have a very busy schedule, you may have to set aside time to read. And this means actually putting it into your schedule, or choosing a specific time of day. Even if it is only 10 or 15 minutes, it will still be a good way to develop habits, help you relax, and allow you to momentarily forget the stresses of everyday life in a healthy way. Try reading on your lunch break, or, getting up earlier than anyone else and reading while you drink a cup of morning coffee. You can also try reducing your Internet time at night – there are some amazing readings available online, but the web can also be very annoying. Reading to your children after dinner or before bed will help them develop a love of reading, and allow you to read more as well. 5. Reading With Others Reading with your children is a wonderful way to teach them the love of reading. But read with others, such as with friends or as part of a club can also be a useful and motivating way to read more. There are even online book clubs that you can follow. These clubs expose you to books you may not have heard of, and they also give you the opportunity to discuss what you have read and learned with others. These discussions and opinions can also give you a greater understanding of the book and its characters. The reading of the Last Word should be a joy, not an obligation. Books are full of magic and mystery, and if you're not used to reading regularly it can be difficult to make the most of it at first. Keep going, however. Grab a book and find time to read during the day. If it's not a good book or if it doesn't bring you pleasure, then stop reading it! You certainly don't have to finish every book you start. What other strategies do you use to add more reading time to your day? Day?
