I'd like to check your local stores before I buy this. This comment was rated as helpless by Slickdeals users joined jun 2008 L6: Expert 1,946 Posts 988 Reputation Thanks Follow user Send a message 10-14-2019 at 06:19 AM #3 Spend \$30 extra and get Wii U. I just need a sd card. 4gb should be enough. The obvious downside is a component or composite output. Be sure to buy a model with GCN controller ports. I don't think red has any. Some whites and blacks may also miss them. you can probably find it cheaper on Goodwill garage sales, but a friend just paid 100 for a pre-modded one on eBay, so it's obviously better than this comment was rated as helpless by Slickdeals users joined in September 2011 Price Compare, Always 13,312 Posts 2,476 Reputations Thank You Follow user Send message 10-14-2019 at 07:09 AM #5 Quote from bonkman : Easy to change with all sorts of good options - playing games with HDD, compatibility with GCN, all kinds of emulators. I just need a sd card. 4gb should be enough. The obvious downside is a component or composite output. Be sure to buy a model with GCN controller ports. I don't think red has any. Some whites and blacks may also miss them. You can probably find it cheaper on Goodwill garage sales, but a friend just paid 100 for a pre-modded one on eBay, so it's obviously better than that \$100 for a pre-modded one's joke price considering how easy it is (practically automated) to fashion them. Aren't they technologically inclined at all? This comment was rated as helpless by Slickdeals users Joined jun 2011 L2: Learned 1,959 Posts 362 Reputation Thanks Follow user Send message 10-14-2019 at 07:24 AM #6 Better goes on eBay This comment is rated as helpless by Slickde users joined Jul 2013 Stuck in Cabin 3,002 Posts 610 Reputation Thank You Follow user Send message 10-14-2019 at 11:53 AM #7 Quote from darkNIGHTS : Spend \$30 extra and get Wii U. Wii you can't play gamecube, if anyone wants to these games with component cable, there really is no better option. Wii U CAN game Gamecube games, the system simply does not have the ability to read Gamecube disks. If you hack wii U, you can install Gamecube game ISO files on internal storage and run them with a GCN controller adapter that is released for Smash 4. This comment is rated as helpless by Slickdeals users Joined by Jul 2014 L2: Beginner 65 Posts 27 Reputation Thanks Follow user Send message 10-14-2019 at 03:28 PM #10 Quote from force1x : Wii U CAN play Gamecube games, the system simply does not have the ability to read Gamecube discs. If you hack wii U, you can install Gamecube game ISO files on internal storage and run them with a GCN controller adapter that is released for Smash 4. He is right that the WiiU can play GameCube games if backed up to internal or external storage. However, having both modded wii and Wii U consoles over the years, the Wii is especially easier to operate. The Modding scene is far better developed (given how the wii exists for longer, and it seems as if almost every person owned one). The potential of bricking the console during modding is practically undone by the number of conductors that guide you by hand to the Wii. The only thing that a modded WiiU can really do outside wii is play some DS games and some PSP games. And the footwork that would make it not unfounded. The potential of bricking the console during modding is practically undone by the number of conductors that guide you by hand to the Wii. The only thing that a modded WiiU can really do outside wii is play some DS games and some PSP games. And the leg is working on this is not unfounded. Can the Wii make an N64? My Wii can. This comment was rated as Helpless by Slickdeals users Joined Jun 2008 L6: Expert 1,946 Posts 988 Reputation Thanks Follow user Send message 10-15-2019 at 01:40 PM #12 Quote from Doctorrhino : Wii you can't play gamecube, If someone wants to play these games with a component cable, there really is no better option. Yes, it can, and Nintendo doesn't. It can even use Wavebirds (with USB adapter) or Wii U Pro controller. My Wii can. Yes, most games have about the same compatibility between the two. Really N64 sis emulation on both though. Dropped textures and incompatible games abound. Last edited taroj89 October 17, 2019 at 12:44 AM. And the footwork that would make it not unfounded. Isn't the Wii limited to 480p? Obviously, if you play GC or Wii games on wii U, you're upscaling from 480p (and 288p if N64) but I'm pretty sure for \$30 more I'd rather have the original 1080p output with HDMI cable than component. Especially since upscaling processes TV (and so if the TV is good at upscaling, it should be fine). I'm saying all this without firsthand, though. Maybe I overestate the difference in quality. Still, it's hard for me to imagine that \$30 isn't worth the advantage of wii U over wii in at least some cases. That said, as I'm right now getting my Wii U (from another GameStop deal) set up, I realize how much more PITA it has to be. Hacking with Haxchi was pretty easy, and the Wii U USB Helper is pretty cool, but hell if I know where to go now. Should I do more than add games via WUP Installer GX2? Do I need a Nintendo? Do I need other emulators and if so, should I use RetroArch or something else? From what I've seen, there's noo-friendly guide in the Wii U community (on reddit or GBAtemp) that just flat-out tells you what to do, they just have guides for their individual projects and if you ask questions that aren't related to that project, they tell you to Google it. While wii community guides are much more comprehensive. Last edited rczried October 17, 2019 at 07:07 AM. Yes, so is my computer. I think the point was he couldn't play them natively. The image isn't available forColor: Wii + Motion Plus is only \$40 these daysRather than jumping ahead to the future of gaming for the holidays, why not ask an explosion from the past with the original Nintendo Wii on sale for \$40? That's what GameStop signals today at least with a drop online only to \$39.99 for a refurbished black Nintendo Wii + Motion Plus controller. The price is actually really good at GameStop and \$10 cheaper than worse-state-owned Wii units selling for \$49.99 per pop. This is an online-only offer, but funny enough if you want to pick up in-store you'll need to add \$30 to the price for exactly the same product with a price of \$69.99. We also noticed two more significant Wii packages on GameStop for \$49.99. The red version is available for sale for \$49.99 and is displayed with a Motion Plus controller although we don't see a description on the site that specifically says you'll get it, so YMMV. The Nintendo Wii owned for \$49.99 is also \$10 more and only comes with a standard Wii remote, however this is available for in-store pickup. GameStop began aggressively selling old Nintendo Wii consoles in its cyber week sales last week. That's got to be what's left in your online warehouses. No expiration date is recorded, so I think once stocks are gone, they're gone for the near future (while GameStop stocks are enough for clearance to sell). You're checked out.
