## Tenor saxophone blues scales

February 4, 2014 by Steve Here's a free sheet I give to all my students after learning their major scales. It's just a sheet with all 12 blues scales on it. When I teach my students to use the blues ladder I taught them to try to move off #4 note quickly when playing. Many students who are new to improvisation will land on #4 and just sit on it without solving it. This is a great note because there is tension to it, but the tension sounds best when you hear the fix. For example, if I'm using the A-scale blues and play an Eb several times you'll hear me solve at E or D, which in most cases are more pleasing notes to the ear. It is good to practice each blues scale to match the minor string, but also to the relatively major agreement. E.g. A blues scale- practice this over a minor a and a C major agreement. There are small variations in how you use this scale, depending on the harmony behind it.
