It's an entertaining and fun game and even relaxing, but at a certain point its complexity becomes absurd, you'll spend hours trying to advance on a level. Bricks n Level Passing Balls: Not the easiest, right? You can make a subscription and be a premium player to eliminate these annoying ads, as well as get more power that really doesn't seem so profitable, other than that they're pretty priced at about \$8 a week, and you'll still get pop-ups every time offering different reinforcements. Bricks n Balls has two modes, classic level and call mode, reach the highest score and outperform your friends. The amount of advertising can quickly consume the battery of your mobile device, but sometimes these ads can be profitable because after seeing some of them, you get rubies that can then be changed. Achieve goals and challenge your brain in the funniest way with bricks n balls. This will make you sharpen your goal, throw and force them to bounce around the spaces between bricks all these orange crazy balls to finally break every block before they reach the bottom of the screen, reach the highest scores, accumulate rubies, increase the number of spheres and advance levels. You'll have a few accelerators throughout the game, for example by changing the rubies you can get more balls and even different sizes, which will be an advantage to achieve an endless rebound chain and obviously eliminate those bricks quickly. In Bricks n Balls you will also get power-ups with each movement and there is an opportunity to play again these levels with a low score or a few stars received and hopefully increase it, among some other options. Cheetah Games4.5107.746 votesRika 'N Balls arcade game where you have to hit every block with a string of balls until they disappear. How to play: In bricks 'N balls you start with a number of balls that you can shoot. Once you shoot the balls they will all fly in a row all over the level. Each level is constructed from blocks with a certain number of strike points. When you hit bricks often enough to get it HP down, the brick disappears and your path is open to aiming for other bricks. Balls can bounce bricks, so if you aim well you can finish level in one shot! About the creator: Brick 'N Balls was created cheetah games. They are also known for Sky, Dance Line and Piano Tiles 2 that available on Pokk! Advertising It's time to beat level 355 Our golden rule of beating bricks n balls level 355 is to shoot balls high through empty channels, however you don't always get the best result in a way you can find yourself shooting in the same position and getting different results towards rebounds: It's an entertaining and fun game and even relaxing, but at a certain point its complexity becomes absurd, you'll spend hours trying to advance on a level. Sharpen your goal! You can make a subscription and be a premium player to eliminate these annoying ads, as well as get more power that really doesn't seem so profitable, other than that they're pretty valuable at about \$8 a week, and you'll still get pop-ups every time, offering different reinforcements even on Bricks n Balls Level 355. Brick n Balls Level 355 has two modes, classic level and call mode, reach the highest score and outperform your friends. The amount of advertising can quickly consume the battery of your mobile device, but sometimes these ads can be profitable because after seeing some of them, you get rubies that can then be changed. Bricks n Balls Level 355 Solved! Achieve goals and challenge your brain in the funniest way with bricks n level 355 balls. This will make you sharpen your goal, throw and force them to bounce around the spaces between bricks all these orange crazy balls to finally break every block before they reach the bottom of the screen, reach the highest scores, accumulate rubies, increase the number of spheres and advance levels. You'll have a few accelerators throughout the game, for example by changing the rubies you can get more balls and even different sizes, which will be an advantage to achieve an endless rebound chain and obviously eliminate those bricks quickly. In bricks n Balls Level 355 you will also get bonuses with each movement and there is an opportunity to play again these levels with a low score or a few stars received and hopefully increase it, among some other options. Bricks n Balls is a really addictive brick breaking puzzle game for mobile devices created by Cheetah Mobile. And today we're going to help you get most out of it by sharing a bunch of bricks n bullet codes and tips in our full strategy guide. Because, yes, there's a lot of strategy involved in the game and taking the time to reflect on your next step can make the difference between winning and losing. So let's see how to keep winning and getting most out of the bricks n balls, checking out our tips and tricks below! Play different game modes Did you know that there are actually three game modes that you can play brick n balls? Yes, there are, and you can select them from the main menu where the missions are shown. Classic mode you start with 5 balls and you work your way endless wave of input lines, each of which is more complicated than the other. It's usually the longest, most time-consuming game mode available and my all-time favorite. 100 ball you have 100 balls and a randomly created level. Your task: destroy as many lines as possible and score as many points as possible and potentially win up to 150 rubies of the campaign This is the main mode of the game where you have to complete the mission and get the three star ratings in order to keep going. This is where you're more likely to spend most of your time. So being aware of these different game modes that are available in the game, you can decide what to play. Each of the game's extra modes can reward you with rubies every day, which in turn can be exchanged for pulses and special moves. So make sure you play them and get as far as possible in every game mode. Find the hole! It's basically the secret to the game: find holes and squeeze balls through them so they bounce over and over again, causing as much damage as possible to nearby (and far) blocks. If there is no discovery (usually occurs in classic mode), you should try to create it by clicking on the block with the least number of required hits. It requires a bit of planning and strategy as well as predicting where the balls end up, but it's worth it! I also realized that when it comes to bouncing, a strategy that is as good as sending shots through holes to run your shots bouncing off one of the walls, at a very small angle. So you get mass destruction every time you play. Getting three stars When playing campaign missions, you will no doubt want to get the three stars at each stage you complete. However, it's not always easy and you'll need to recreate it to get there. In order to get three stars, you will need to score a lot of points and in order to do so, you will have to cause as much devastation as possible. The more blocks you totally destroy with one step, the higher your score. So keep trying and repeating training where you could improve your game and you'll no doubt get all three starts in each mission. Use power wisely power-ups – this is a great way to help you easily beat all stages, no matter what game mode you play. But they are also expensive and very difficult to get, so make sure you only use them when it matters. It makes no sense to use them in 100 balls or classic mode unless you're going for a reward of 100 rubies, since boost costs 100 rubies and you only earn 50 (at best) otherwise. Use these power outages when you're really confident they'll make a difference and help you win an otherwise difficult stage - or help you get there where you want, but only after you've tried a couple of times and seen that there's no way to do it with additional help. Getting free rubies Usually you can watch in-game ads, from the store menu and earn 20 Rubies for every ad you watch – up to a total of 100 every day. However, every day you can also click the daily sign-in bonus button, and there you have an extra ad you can watch – but this time, you'll be earning 50 rubies for that. Make sure you take advantage of this daily replenishment offer! And that would be it! Brick n Balls is a lot of fun and we hope our tips and tricks manage to help make it even more fun by helping you get the most out of it. If you have some bricks n Balls tips and tricks of your own – strategies that you know or anything else that you believe is worth sharing with our readers, feel free to let us know by commenting below! Bricks n Balls is a new mobile game from Cheetah Mobile that reminds us of the classic brick games we used to play when we were kids. Our goal is to provide you with the best available bricks n balls cheats and tips to help you get most out of this great game. So keep reading and learn how to play Bricks n Balls the best way! 1. Play all available game modes Win rubies by playing all bricks n balls modes offers you the opportunity to play three game modes. You will find them in the main menu, which also shows missions. In classic mode you get 5 balls and you need to work your way through the incoming lines. The difficulty increases as you progress through the game. In 100-goal mode, players get 100 balls they need to use to destroy as many lines as they can and score as many as possible. You can get as many as 150 precious rubies. Campaign mode is probably the one you'll play the most. Players must complete missions and win three star ratings to keep going. Each game mode can help you win rubies on a daily basis. Since rubies can be exchanged for special moves and reinforcements, playing on all modes can be a huge advantage. 2. Be vigilant for holes and make sure you find them this is probably the main secret of bricks n balls. Squeeze the balls through the holes will make them bounce several times, causing more damage. If you can't find any holes, do your best to make one by clicking on a block with a minimum number of shots. You'll need to plan your hits carefully, but it's worth the effort. If you bounce the ball off one of the walls, preferably at a very small angle, you will do more damage. 3. Hit Lower Levels Keep the lower levels under control It is extremely important to keep the lower levels in check, especially when you are playing greater levels. If you focus on the top lines and go to the bottom lines, you may find it too late to get rid of you left at the bottom. 4. Use your power-ups to wisely use them only when absolutely necessary, although this is true true Power can help go through stages easily, regardless of the mode you play, you should keep in mind that they are quite expensive. So make sure you use them wisely. Since each pulse costs 100 rubies, using them in classic mode or in 100 balls makes no sense. If you're not trying to get a reward of 100 rubies, of course. So try to use power only when you're going for high rewards or when you find it hard to pass the level without any extra help. 5. Work Corners The best you can avoid taking straight shots Making straight shots is definitely a bad strategy in bricks n balls. Bouncing balls and looking for angles that will help you hit as many bricks as possible is the best way to score high. Straight shots are only useful when there are a few bricks left for you to break. 6. Save the green moves hit them when they probably do more damage try to keep the green moving when they are most needed and angle your shots to break other blocks instead. If you use special green shots at the right time, you will do more damage than you think. 7. Aim for three stars to repeat the level if needed getting three stars when playing campaign missions in Bricks n Balls will help you improve your skills and score higher. The more blocks you destroy, the higher you will score. While it's not always an easy task, you have the ability to recreate the level and achieve your goal. You will no doubt want to get three stars at every stage you complete. Clearing levels fills the bonus panel; the more stars you earn, the more you will fill the bar. 8. Get all the free rubies you can log in daily and watch ads for goodies Watching in-game ads will allow you to earn up to 100 rubies every day. You'll get 20 rubies for every ad you watch. Clicking the daily sign-in bonus button can also win you 50 rubies. You should definitely take advantage of this daily replenishment! You can spend rubies on new balls of different sizes (from 14 mm to 30 mm). Each ball comes with certain advantages. For example, smaller balls will more easily penetrate holes, while larger one will hit more bricks. Watching ads can also help you win extra balls when you need them most. If you pause a game and tap +3, thirty seconds of the ad will be played. The three extra balls you'll get after watching your ad may be exactly what you need to complete the level. These are a lot of our top tips and tricks for bricks n balls. Let's hope our tips and tricks make the game even funnier and allow you to make the most of it! No, no
