Some error text Name. It is the first level of contact of individuals, the family and the community with the Primary Health Care in Southern Africa: A comprehensive approach 3rd edition health system, bringing health care as close as possible to where people live and work, and constitutes the first element of a continuing health care service. Skip to toolbar About WordPress. Choose your country or region Close. Expected to ship within 6 - 10 working days. The aim of NHI is to promote universal access to appropriate, efficient and quality health services. However, despite going through years of structural reform and sincere commitment to achieving health for all, the slow response by Government to provide equitable and quality health services to all individuals has hampered progress in achieving the desired health outcomes. However, the South African government is responding with a far-reaching reform plan to revitalise and restructure the South African health care system, including: Fast-tracking the implementation of a National Health Insurance scheme, which will eventually cover all South Africans. Immunisation is a significant barrier against disease and death, and the rates of children receiving their primary vaccines have steadily been increasing under immunisation programmes. It will promote equity and efficiency to ensure that all South Africans have access to affordable, quality health care services regardless of their employment status and ability to make a direct monetary contribution to the NHI Fund. The renewed focus on primary health and the improving and expanding the health system infrastructure should go some way to addressing the high mortality rates — and get South Africa closer to the MDG target of reducing infant mortality to 20 by Note: Search is limited to the most recent articles. This bottom-up approach, which focussed on prevention and management of health problems in their social setting, turned out to be a better option to the typical top-down, technological approach and rekindled hope about the possibility of addressing inequality to improve universal health. Add more categories. Falling GDP and shrinking health budgets have impacted negatively on many countries in Africa. Even basic health promotion and prevention activities that had proved to be effective, such as health education, could not be sustained. Our distribution centers are open and orders can be placed online.
