Please note that ebooks and other digital media downloads are not returnable and all sales Focus On Reducing And Calculating Fractions final. Kumon is a very trusted name in education, but most people associate their materials with early learning. Over the past several years, Kumon has developed math materials up through 6th grade, Focus On Reducing And Calculating Fractions these new additions focus on areas in which some students have difficulty. The idea behind this series is to help students 'master' fundamentals for a solid math future.

The Kumon methodology is to tackle one skill at a time and 'focus' upon it until the student understands and can 'apply' it. The workbooks follow a systematic, incremental approach that allows children to learn at their own pace and practices each skill intensely. Each workbook has 27 or 28 two-page lessons, and it is suggested that you do a few pages each day and do the pages in order.

The books are printed in black and white with a single accent color, unlike the regular Kumon math curriculum, which is more colorful. The intention is for the child to complete the workbooks independently and even do their own checking with the answer key found at the back of the book. If a child has difficulty, they should go back to an easier section of the book and redo it; working forward from that point again.

A listing of individual items that make up a package is provided on the package item's product detail page along with real-time item availability of those items. Any item sold as a package on our website is identified by a unique alpha-numeric item number such as "APH1AB". Although packages are sets, items are not physically bundled together. Because most package items or components are also sold separately and may be components of multiple packages, these items may not have the same inventory availability at any point in time.

When you order a package, you are charged one price for all package items. In-stock components will ship according to our normal shipping time. Any backordered components will ship separately as they become available.

On your packing slip, package components are picked and packed individually and are identified with the code "PKGCOMP" in the price column. The package item number is also listed at the bottom of your packing slip for reference. Please note that if your order ships in multiple boxes, package components may not all be in the same box.

Package content is not flexible and cannot be modified. Packages are returnable if all package items are returned, but individual items purchased as part of a package are returned, they may be refunded for less than the individual purchase price of that item, as they were purchased as part of a discounted package.
