Dwellings: A Spiritual History of the Living World - Linda Hogan - Google книги

Sign up for LibraryThing to find out whether you'll like this book. I might say natural history, but this is more philosophical than you usually see in natural history works.

Also, unlike many natural history works, Hogan does not position humans as non-natural. Perhaps I should Dwellings: A Spiritual History of the

Living World these are essays on the need to fit snugly and peacefully into the world, to overcome the positioning of ourselves as Other. Her essays speak strongly to me, reflecting my own frustrations and infatuations with science, my own ambivalence about the false dichotomy of observing vs. I took this one backpacking with me, hoping that it would be a good backpacking-book.

It was. But it's just as good a living-at-home-in-the-city book. And maybe more necessary there, perhaps. A Chickasaw, Hogan is deeply involved with trying to relearn the "tribal knowings of thousands of years," revelations about the mysteries of life we've devalued, then forgotten. Hogan does succeed in tapping into some forgotten wisdom in her essays, which, though concise, cover and transcend a great deal of territory.

Some relate personal experiences, such as participating in a sweat lodge ceremony or observing snakes, eagles, bats, wolves, flamingos, fish, and termites; and other essays focus on the implications of scientific endeavors, such as teaching chimpanzees sign language or the curious coupling of technology and hope inherent in the Voyager's Interstellar Record, that sound and photo album from Earth for the universe. Hogan writes again and again of the "circular infinity" of life and death, of how air, earth, and water commingle and transform each other, how flowers bloom even in a place as blasted as Hiroshima.

The earth has a much stronger will than we do, Hogan tells us, a truth we should acknowledge and respect. Donna Seaman This review has been flagged by multiple users as abuse of the terms of service and is no longer displayed show. CollegeReading Sep 12, Dwellings: A Spiritual History of the Living World is an interesting book, lyrical in places, full of the author's impressions of nature and the world, and the spiritual conclusions she's drawn from this.

Linda Hogan is a Chickasaw poet, and her view of things is heavily influenced by native american tradition.

She's travelled extensively, and very clearly loves her world and believes in the strength of her traditions. I found this a fascinating read, and a good insight into the author's beliefs and world. Despite that, a lot of this book left me appreciating the beautiful writing and the ideas she was trying to express; but essentially Dwellings: A Spiritual History of the Living World. I don't think this is a fault in the book. I think this is simply because, unlike Linda Hogan, I'm not an earth person.

I don't see the world in the same terms she does. She says it herself, in a chapter on the Voyager spacecraft: "There seemed to be two kinds of people; earth people and those others, the sky people, who stumbled over pebbles while they walked around with their heads in clouds. Sky people loved different worlds than I loved; they looked at nests in treetops and followed the long white snake of vapor trails.

If you're an earth person, fascinated by our Dwellings: A Spiritual History of the Living World and the creatures who live in it - read away. I don't think you'll regret it.

Mounted soldiers did not appear until much later in history and the chariot was an advanced weapon of war long before their adoption. Chariots were not utilized as a general conveyance by members of the public and charioteers were viewed as elite forces and valued far more than the common soldier.

As wars became common between the different societies, the chariot was adopted and utilized by the military forces. They are depicted in many drawings of royalty and were symbols of power. Neidich World History Expansion Essay Throughout the history expansion, groups have set out to conquer various lands, people, and cities for a multitude of reasons; social, political, economic, and environmental.

The three groups that are known for their similar expansion efforts are the Mongols, Spanish, and Ottoman. From Mongolia experienced a drop in temperature.

Without animals, the Mongol society could not survive either. This decreased the trade from North and Northwest. The Mongols needed to obtain goods, but without this, Mongols initiated attack and invasion against the two dynasties.

They had 10 squadrons; the ten of them formed a unit of 1,000 men. The Mongols applied these techniques with greater force. This would prove useful in overpowering the great Chinese cities years ahead. They received tribute and trade because they controlled the Silk Road routes. In order to expand to other lands, the Mongols used a qualified people. In Yelu Qucai demonstrated how much wealth the region could produce.

The Mongols kept this system in place. As this was kept up, everything and everyone remained in their positions. Unlike the Mongols, the necessary preconditions for the rise of empires: a.

State-level government: Rome: republic then empire with emperor Han: kept most of Qin centralized government in place b. High agricultural potential in the area: Rome: wheat, grapes, cattle Han: wheat, millet, pigs c. Han: Qin broke into smaller states e. Mutual antagonisms among those states: Rome: rivalry between pastoralists in hills and agriculturalists in plains Han: Warring States period before Qin unification f. Adequate military resources: Rome: soldiers first recruited only from peasant class on Italian peninsula; population inexhaustible.

Han: Soldiers recruited from peasant class within the empire; population inexhaustible.

The primary reason a state succeeded in empire building was: a. This was the most significant geographic feature because of the multiple advantages the Nile provided that affected many aspects of Egyptian way of life. The first way it affected the Egyptian development was by providing a variety of building material from its riverbed.

Mud from the Nile was dried in the sun and used to make basic structures and housing. In the riverbed there was also sandstone and limestone that was used for building temples, statues and pyramids. The second way the Nile benefited Egypt's development was the benefit to agriculture. The Nile provided farmers a way to irrigate crops as well as provided fertile top soil to farmers. The Nile had a wide riverbed which decreased chances of flooding and made it safer and more predictable.

The last way the Nile affected development was its economical benefit. The Nile tributaries could be taken north to trade with the Mediterranean area and south to trade with South Africa. Part B The origin of the chariot is Mesopotamia. The concept of a chariot was spread to other societies by travelers, traders and military use during invasions and wars.

The chariot was modified by different societies by changing what it was Franz Ferdinand of Austria Hungary. Yes, the Balkans was overlapping many groups that were trying to unite the Slavs and take over more and more territory. That caused major conflict in Europe. Powder Keg refers to a Balkan region full of explosives. It would be very unstable. The Balkans caused instability in Europe due to different people wanting its land.

Not everyone could have it. Everyone wanted it and no one would just allow the other to invade it and take it for them. Do you think World War I was avoidable? Yes, practically any war is avoidable. World War I would have been a difficult thing to avoid, but if tension in Europe could have been resolved then it might not have happened. Page 3. Which countries comprised the Central Powers? Which countries comprised the Allies? What were the characteristics of trench warfare?

The soldiers that were in trench warfare had to undergo malaria as well. Ferguson attests that the U.S. All the while, the attention deficits within the political system are defeating in this test is due on Wednesday, February 27th. Type the letter of the countries that are numbered next to their number in the box to the lower right. There is a map on use it! Multiple Choice: 1. What was a benefit television offered the world after its commercial inception?

B: Soap operas and variety shows accurately depicted life in America. C: Viewers were able to see events and distant lands they would probably never see in person. D: Jersey Shore. What impression did foreign viewers get of Americans after watching their shows? B: America is the land of plenty and its middle class citizens are squeaky clean.

D: American bands such as the Rolling Stones and the Beatles were influential to world culture. How did the launch of Sputnik affect relations between America and the Soviet Union? B: The Soviets won the Space Race. C: America abandoned its space research programs. D: It proved to the Russians that their technology was inferior.

Which country won the Space Race by landing an astronaut on the Moon? Grains grew widespread in the Fertile Crescent The crescent shaped area which had an ideal climate and soil for growing plants and raising livestock, it stretches from Egypt, up the Mediterranean coast to Turkey, and then down again to the border between Iraq and Iran. Hunter-gatherers were drawn to the cereal grains and, the ability to keep the grains for long periods of time stimulated them to stay.

If they hunter-gatherers could thrive off the wild grain if they were willing to stay in the Fertile Crescent it and harvest at its peak. After the hunter-gatherers had spent so much time collecting the grain they would have been reluctant to leave the grain that they had

collected nor could they travel with it.

For this reason hunter-gatherers began to settle on the land. These settlers soon found that the grain could be stockpiled for long periods of time without spoiling.

The technology of these settlers was still in development so storage spaces were not usually watertight, and when the water got into the stockpile of the collected grains they started to sprout and acquired Dwellings: A Spiritual History of the Living World sweet taste.

It is winter and there is smoke from the fires. It is a world of elemental attention, of all things working together, listening to what speaks in the blood. Whichever road I follow, I walk in the land of many gods, and they love and eat one another. Suddenly all my ancestors are behind me. Be still, they say. Watch and listen. You are the result of the love of thousands. The light of the sunflower was one language, but there are others more audible. Once, in the redwood forest, I heard a beat, something like a drum or a heart coming from the ground and trees and wind.

That underground current stirred a kind of knowing inside me, a kinship and longing, a dream barely remembered that disappeared back to the body Tonight, I walk. I am watching the sky. I think of the people who came before me and how they knew the placement of the stars in the sky, watching the moving sun long and hard enough to witness how a certain angle of light touched a stone only once a year. Without written records, they knew the gods of every night, the small, fine details of the world around them and the immensity above them.

Walking, I can almost hear Dwellings: A Spiritual History of the Living World redwoods beating Walking, I am listening to a deeper way. The green leaves turned toward her, whispering tales of soft breezes and the murmurs of leaf against leaf. Our elders believe this to be so, that it is possible to Dwellings: A Spiritual History of the Living World a way backwards to the start of things, and in doing so find a form of sacred reason, different from ordinary reason, that is linked to forces of nature.

In this kind of mind, like in the feather, is the power of sky and thunder and sun, and many have had alliances and partnerships with it, a way of thought older than measured time, less primitive than the rational present.

Others have tried for centuries to understand the world by science and intellect but have not yet done so, not yet understood animals, finite earth, or even their own minds and behavior.

The more they seek to learn the world, the closer they come to the spiritual, the magical origins of creation. There is a still place, a gap between the worlds, spoken by the tribal knowings of thousands of years.

In it are silent flyings that stand aside from human struggles and the designs of our own makings. At times, when we Dwellings: A Spiritual History of the Living World silent enough, still enough, we take a step into such mystery, the place of spirit, and mystery, we must remember, by its very nature does not wish to be known.

There are already so many holes in the universe that will never again be filled, and each of them forces us to question why we permitted such loss, such tearing away at the fabric of life, and how we will Dwellings: A Spiritual History of the Living World with our planet in the future. There is solitude and the nurturing silence that is relationship with ourselves, but even then we are part of something larger. Without it, we have no home, no place of our own within the creation.

It is not only the vocabulary of science we desire. We want a language of that different yield. A yield rich as the harvests of the earth, a yield that returns us to our own sacredness, to a self-love and resort that will carry out to others.

The water closes, seamless, around me. My foot with its blue-green veins is vulnerable beside this rock-hard world that wants to someday take me in. Can we love what will swallow us when we are gone? I love what will consume us all, the place where the tunneling worms and roots of plants dwell, where the slow deep centuries of earth are undoing and remaking themselves.
