What Do You Say After You Say Hello? by Eric Berne

Eric Berne May 10, What Do You Say After You Say Hello?: The Psychology of Human Destiny July 15, was a Canadian-born psychiatrist who created the theory of transactional analysis as a way of explaining human behavior. Berne's theory of transactional analysis was based on the ideas of Freud but was distinctly different. Freudian psychotherapists focused on talk therapy as a way of gaining insight to their patient's personalities. Berne was the first psychiatrist to apply game theory to the field of psychiatry.

His only sibling, his sister Grace, was born five years later. The family immigrated to Canada from Poland and Russia. Both parents graduated from McGill University in Montreal. Eric was close to his father and spoke fondly of how he accompanied his father on rounds, traveling by horse-pulled sleigh on cold Montreal winters to visit patients. Berne's father died of tuberculosis when Berne was His mother then supported herself and her two children working as an editor and writer.

She encouraged her son to follow in his father's footsteps and to study medicine. After completing his one-year internship in he began his psychiatric residency at the Psychiatric Clinic of Yale University School of Medicine where he worked for two years. In he was admitted as a Fellow in the American Psychiatric Association. From he was employed as a psychiatrist in a sanitarium in Connecticut, and concurrently as a clinical assistant in psychiatry at Mt Sinai Hospital in New York.

He also maintained a private practice. He rose from the rank of Lieutenant, to Captain, and then to Major. Ord, California and Brigham City, Utah. After his discharge in he settled in Carmel, California, and resumed his psychoanalytic training that he had begun in New York City, prior to the War, at the San Francisco Psychoanalytic Society and Institute. From to Berne had a private practices in both Carmel and San Francisco and kept up a demanding pace of research, teaching in addition.

He took an appointment in as Assistant Psychiatrist at Mt. The years from to were restless ones for Berne. His personal life became chaotic and he concentrated on his writing. Berne created the theory of transactional analysis as a way to explain human behavior.

Berne's theory was based on the ideas of Freud but were distinctly different. Freudian psychotherapists focused on patient's personalities. He then investigated communications between individuals based on the current state of each. He called these interpersonal interactions transactions and used the label games to refer to certain patterns of transactions which popped up repeatedly in everyday life.

The origins of transactional analysis can be traced to the first five of Berne's six articles on intuition, which he began writing in Even at this early juncture and while still working to become a psychoanalyst his writings challenged Freudian concepts of the unconscious.

In after 15 years of psychoanalytic training, Berne was refused admission to the San Francisco Psychoanalytic Institute as a fully-fledged psychoanalyst. He interpreted the request for several more years of training as a rejection and decided to walk away from psychoanalysis. With the publication of this paper in the issue of the American Journal of Psychotherapy, Berne's new method of diagnosis and treatment, transactional analysis, became a permanent part of the psychotherapeutic literature.

In addition to restating his concepts of ego states and structural analysis, the paper added the important new features of transactional analysis proper i. His seminar group from the s developed the term transactional analysis TA to describe therapies based on his work. By this expanded into the International Transactional Analysis Association. While still largely ignored by the psychoanalytic community, many therapists have put his ideas in practice. In the early s he published both technical and popular accounts of his conclusions.

His first full-length book on TA was published intitled Transactional Analysis in Psychotherapy. Eric Berne that has sold more than five million copies. The What Do You Say After You Say Hello?: The Psychology of Human Destiny of games described by Berne are that they are not zero-sum games i. On the contrary, the "games people play" usually pay all of the players off, even those who ostensibly are the losers, since they are about psychic equilibrium or promoting adopted self-damaging social roles instead of rational benefits.

These payoffs are not consciously sought by the players but they are leading to the ultimate unconscious life script of each as set by their parental family interactions and favored emotions. Despite having been written for professional therapists, the book What Do You Say After You Say Hello?: The Psychology of Human Destiny a New York Times bestseller and made Berne famous.

Some of this terminology became a part of popular American vocabulary. Berne had an irrepressible sense of humour, which was particularly evident in his writing.

For example, in his article entitled Who was condom? Berne wrote about the contraceptive, the condom, and whether a man named Condom ever existed. He continued to write under pseudonyms such as Cyprian St. Berne was married three times. They married in had two children, and divorced acrimoniously in The couple took up residence in Carmel, California where he wrote, but he continued some clinical work in San Francisco.

This marriage also ended in divorce, in early Berne died of a heart attack in Carmel on July 15, From Wikipedia, the free encyclopedia. Canadian psychiatrist. Montreal Quebec Canada. Carmel-by-the-Sea, California U.

Eric Berne. Hij specialiseerde zich in groepstherapie en in sociale psychiatrie, en streefde ernaar mensen te genezen in plaats van vooruitgang te boeken in de behandeling. Zijn zus Grace werd vijf jaar later geboren. Zijn ouders waren immigranten uit Polen en Rusland. Beide ouders waren afgestudeerd aan McGill University. Bernstein is overleden aan tuberculose op de leeftijd van Bernstein is vervolgens om zichzelf en haar twee kinderen te onderhouden gaan werken als redactrice en schrijfster.

Eric werd aangemoedigd om in de voetsporen van zijn vader te treden en ging geneeskunde studeren. Hij ontving een M.

Doctor of Medicine en Ch. Foto: Wikipedia. Toon meer Toon minder. In this book, Dr Eric Berne reveals how everyone's life follows a predetermined script - a script they compose for themselves during early childhood. The script may be a sad one, it may be a successful one; it decides how a person will relate to their colleagues, what sort of person they will marry, how many children they will have, and even what circumstances they will die in It gives you the insight to recognise the underlying motivations behind your actions and better understand your own psychology.
