It was a challenge to look at an image of a star cluster and discern what was happening for a querent. It took me a few tries, but as I did so, I wondered if this irritated feeling was the same as someone might feel when gazing at the stars. After a few tries, I found that I could read them. Image interpretation is different for each individual: one person might be able to read this deck with no issues, while another would have a great deal more trouble.

For example, card 16, the Tower, is quite dark and foreboding, which is how that card normally is read, regardless of design. I found the First Light Tarot enjoyable to use, and I loved the idea of divining with stars I could not normally expect to see with my naked eye. I could easily picture using them as a meditation tool. The symbolism in this deck is visually rich, and thus it lends itself readily to intuitive interpretation. For this reason, this deck may be a good one to teach tarot to students in a class format, though as mentioned above, it may not be the best for a new person to begin their solitary exploration of tarot. First Light Tarot : 22 Majors, 22 Insights, 22 Spread Cards, Cards by Roseber | eBay

These cards are titled but rely heavily on numerological significance. Each card has two text boxes for the title and keywords in the same manner and the Tarot trumps. Every card has its individual number and the numerological reduction. As a standalone reading deck it works well. A downside is that I wonder if the cards need the second text box in the lower corner. The power of an oracle deck is the ability to pull out the intuition. It seems that at times the Title and the Keyword on the card seem to compete. An example is on 2 Attraction the keyword is Manifestation. The guidebook and reference card give little information on how these link. Even this is a small issue and could easily be overlooked, I have used the bottom keyword to be a reversed title in a reading and that worked better than I expected. The twenty-two spread cards are a comprehensive set of positions that will meet just about every spread position need you have.

Gorgeous space images and the variety of cards lend the decks to a freedom of use that is empowering. The most fun has been when I have shuffled all three separately and then laid out three spread cards, then three Trumps, then three Insight. This creates the spread, a reading with both a tarot and oracle card working seamlessly together. Shuffling the spread positions works a bit better than I expected. I like to have a bit more control over a reading but this is very open. First, 22 new spread cards eliminate the need to learn cumbersome pattern arrangements and instantly address the top issues facing people today.

Next, 22 channeled insight cards invite you to look outside yourself, providing advice on how to make life better here on Earth. The remaining 22 cards represent the traditional Major Arcana, allowing you to delve into the self and provide answers to life's tricky questions. A companion guide explains the new system and offers alternative ways to use the deck, including as a meditation or clarification tool. Also included is a full-size reference card with tips, keywords, and astrological and number definitions. Additional Product Features Number of Volumes. Show More Show Less. Each image for the cards list the location, and give credit to those involved in the image. These cards are larger than common playing cards, and it takes a bit of skill to shuffle them. The booklet begins with an acknowledgment, an anecdote on the title, descriptions of the spreads and how the spread cards can be used, as well as correspondences for astrology and numerology, a section on the images, and so forth. It then goes on to explain the 22 majors and 22 insight cards.

It devotes a page to each of the cards of the major arcana with upright and reversed meanings given. However, while the images are different, the meanings are similar for the most part. There are no minor arcana. Though, the 22 insight cards could be taken as minor arcana, but they closer resemble cards found in oracle decks. The spread cards are something else all together. The 22 spread cards can be used to create your own spreads, in your own manner, without the structure of most other tarot or oracle books and decks.

For example, I often take the spread cards and take out the ones that I feel represent the questions I want answered. I like to focus on a question, decide how it should be looked at, and then lay the cards face down. I will take the remaining 44 and focus on my question, as well as mentally showing to the Universe that the cards should lie in the manner of the facedown spread. Then I flip the spread cards, and follow up with the divination cards.

So far I have not been disappointed. I should also note that First Light Tarot can be used with other spreads. I have used the 22 major arcana and 22 insight cards with spreads from different books with favourable results. However, I found these cards more difficult to read than other decks, as

I am used to reading decks with intricate artwork. It was a challenge to look at an image of a star cluster and discern what was happening for a querent.

Image interpretation is different for each individual: one person might be able to read this deck with no issues, while another would have a great deal more trouble.

The cards also work well with both traditional tarot spreads and spreads commonly found in guidebooks that accompany oracle decks, most of which are strongly based upon traditional tarot spreads. Card imagery of The First Light Tarot lacks the symbolism of tarot cards so readers do not feel bogged down with symbolic associations due to the simple imagery found in outer space photographs. The 22 cards of the Major Arcana of The First Light Tarot have astrological associations that are factored into their card interpretations. The 22 Insight Cards have numerological associations as part of their interpretations giving The First Light Tarot a heavy dose of Numerology if one also takes into account the numerological associations typically associated to cards of the Tarot major arcana.

The card images of The First Light Tarot are beautiful, but unlike other Schiffer decks, the card stock is flimsy with a semi-gloss finish. The Major Arcana, Insight, and Spread cards all have different card backs so they can be easily sorted by looking at the reverse side of each card. The cards are very flexible and are therefore easy to shuffle despite their size. The First Light Tarot lend themselves well to both tarot and oracle spreads making this a well-rounded deck with numerous applications. The card images have a great energy as they are both bright and dark at the same time. One of the best Sun cards I have seen as the image of the actual Sun is dynamic, warm and draws the eye. I also love the Devil card as the nebula pictured is foreboding. I would have loved a great shot of the Earth from space for the world and the Emperor cards seems. The treasure in this set is the Insight oracle. These cards are titled but rely heavily on numerological significance.
